SAVE MONEY BY PARCEL POST. READ THIS

Seeds, plants and bulbs are now covered by the commercial rates, except that all

under eight ounces are charged one cent for each two ounces or fraction.

In our desire to give patrons full advantage of parcel post we have made a new departure and now give our customers who so wish the privilege of ordering seeds by parcel post at freight prices, plus the actual postage, figured on one-pound lots and up. To illustrate our meaning, suppose Mr. Jones of Albany orders 10 pounds of corn seed by mail and our freight rate is 30c per lb. This is the second zone, or 5c for the first one pound and 1 c for each additional pound. He should, therefore, remit us \$3.00 for the corn and 14c postage.

This may be applied to any zone according to the rates. In case, however, that our customers are not sure of the rate and zone, they may send what is certain to

cover postage and we will return stamps for any over run.

In the latter case, mark your order "Postage Allowance" with amount enclosed. This offer applies only to 1-pound or more and will be made only when specified by the customer.

HOW TO ORDER

Order early as there is a heavy demand on some stock and it may be exhausted. Remittance must accompany your order. Stamps are accepted up to \$1.00. Money Orders, Express Orders, Bank Drafts and Certified Checks are preferred. Checks not certified may cause delay in filling your order.

Prices in this catalog by Express or Freight do not cover shiping expenses. E. or

F. indicates express or freight.

Unless otherwise mentioned, all prices are postpaid, except those by Express or Freight and indicated by E. or F.
All prices up to and including one pound include shipping expenses and for more

only when indicated.

Be sure to give shipping instructions and write your name and address plainly on your order sheet.

MARKET GARDENERS

Who buy in large quantities should send us their list for prices. We have a large trade with market gardeners.

PARCEL POST RATES

Weight Limit, to second zone inclusive, 70 pounds; above that, 50 pounds. Size Limit, not to exceed 84 inches, found by adding length and girth combined. Up to 8 ozs., 1 cent for each two ounces or fraction. Local Zone, 5c for first lb. or fraction over 8 ozs., add 1 cent for each 2 lbs. or fraction. 1st Zone, 5c for first lb. or fraction, add 1 cent for each additional pound or fraction. 2nd Zone, 5c for first lb. or fraction, add 1 cent for each additional pound or fraction. 3rd Zone, 6c for first lb. or fraction, add 2 cents for each additional pound or fraction. 4th Zone, 7c for first lb. or fraction, add 4 cents for each additional pound or fraction. 5th Zone, 8c for first lb. or fraction, add 6 cents for each additional pound or fraction. 6th Zone, 9c for first lb. or fraction, add 8 cents for each additional pound or fraction. 7th Zone, 11c for first lb. or fraction, add 10 cents for each additional pound or fraction. 8th Zone, 12c for first lb. or fraction, add 12 cents for each additional pound or fraction. Insurance, 5c for full value up to \$25.00; 10c for \$25.00 to \$50.00.

Returned Goods, main package must not be sealed and communications are barred. War Tax, 1c on each package costing 25c or fraction in postage.

Eleventh Annual Catalogue

Gill Brothers Seed Company Portland, Oregon, Route 1

PHONE TABOR 2683

TO REACH FARM

Take Mt. Hood Depot car on Montavilla line to 89th Street, thence four blocks east and four north to Farm. Our business is all transacted direct from our Farm. Phone Tabor 2683.

FOREWORD

Dear Customers and Readers:

Our catalog is again before you, after a successful season. Our business is growing steadily in volume and this surely indicates that our seeds, etc., are meeting with the approval of our customers.

Every farmer realizes the extreme cost of growing crops during the past season. The costs of labor, fertilizer, machinery and everything entering into the production of the crop have been higher and often have been very hard to secure at all.

Regardless of these conditions, we have produced and secured a good stock of high quality seeds, etc., and will do our best towards caring for our customers.

OREGON GROWN SEEDS

Will, on account of their acclimation, give the best results, and while we do not contend that all lines of seeds can be grown successfully here, however, there are many that reach perfection in this climate. This is especially noticeable in corn, beans, peas, cabbage, pumpkins, squash, onions and practically all of the root crops. The increase in production from greater vitality and adaptiveness will materially increase your returns, as those who have made comparative trials have readily testified.

Then again, all other things being equal, the fact that we are assisting the development of commercial seed growing in the Northwest should commend us for your patronage.

DO YOU WISH TO RECEIVE OUR CATALOG?

Following up to the request of the Government to conserve paper, we have decided on a new policy regarding catalogs, and we will issue a catalog only to those who are our customers. All who purchase an order, no matter how small, are recorded in our mailing list and to those only will we mail our 1921 catalog. will be glad to mail our catalog at any time on request.

PRACTICAL EXPERIENCE

As market gardeners and the many tests we have made for years, has given us a thorough knowledge of the varieties best suited for our climate, and aside from those varieties which we grow, has enabled us to secure our seed from the best sources. In that respect we differ from the average seed store where the experience is more from a selling standpoint.

OUR CATALOG

Has been prepared with the desire to have it sensible and free from exaggeration. The cuts used are practically all made from photographs taken from samples grown by ourselves and are reasonable illustrations of the results obtained from our seeds. We are opposed to filling our catalog with a long list of worthless novelties and are confining our list to the fewest possible of the best varieties, and introducing only those new sorts which have some added value over other introductions. Those who receive more than one copy of our catalog will confer a favor by handing it to someone interested.

OUR GUARANTEE

We guarantee our seed to be true toname and will be responsible to the amount of the purchase price of the article. Germination is so dependent upon weather conditions, the time and manner of planting, which are beyond our control, that we do not guarantee this, other than in a fair and proper test, and under such will be responsible for the purchase price only. Under no conditions do we obligate ourselves for the failure of a crop other than has been set forth above.

APPRECIATION

We extend to all our customers our thanks for their patronage and wish to express our appreciation to those who have so kindly mentioned our firm to their friends.

Our aim is to give everyone a square deal, and we hope those who have not yet purchased of us will at least favor us with a trial order.

CHEAP SEEDS DO NOT PAY

In no other place does quality count so much as in seeds, and the practice of using cheap seeds is poor economy. The desire upon the part of so many farmers for price cutting is largely responsible for the immense amount of worthless, cheap seed that is being sold throughout the country, and when the average farmer realizes that quality is the first and main consideration in seed buying, his demand will force the production of better seed all along the line.

We are not a cheap seed firm, and our aim is not and never will be to sell the cheapest seed. Good seed means careful selection and years of work in breeding up. This cannot be done without added expense. If you would produce the best, you must plant from thoroughbred stock, and, after all, the difference between the cost of good and cheap seed does not begin to compare with the difference in the crops.

At a time like this when labor costs are such a factor in producing a crop, beware of poor seed; get only the best, for the best is cheaper now, measured by results, than at any other time in history.

BEWARE! During the war extreme prices caused an overproduction of many kinds of seeds, also foreign governments put on embargoes to protect their seed supply. Owing to these conditions there are, throughout the country, immense stocks of old seed of low germination, and customers should buy only of reliable seed houses. Our seed stocks are all carefully tested and are guaranteed. (See our guarantee.)

PLANTING THE SEED

We are fully convinced that much failure in seed germination is due to careless planting, and those inexperienced in garden work are urged to study the culture directions at the heads of the different vegetable lists.

The all too common folly of wet plowing has ruined many crops, for the cloddy, run-together condition of the soil after such work is disastrous to the growth of any plant. Planting too early or in damp, cold ground will never make for success and should be avoided. Too deep or too shallow planting is often the cause of poor germination and the weather conditions should be studied.

OUR DAHLIAS LEAD

Dahlias are one of our leading specialties and we are now the most extensive growers west of the Mississippi River. We have originated and introduced over forty new varieties of exceptional merit. Our acclimated bulbs will give 100 per cent better results than Eastern stock. We wish to extend to all a hearty invitation to visit our farm.

MISTAKES

Unfortunately, like all other human beings, we are apt to make mistakes, and if an error does occur, we will consider it a favor to be notified at once so that we can rectify the oversight.

If you have a complaint, tell us first. In the rush of Spring business, mistakes may happen, but if so, tell us pleasantly about it and be assured of courteous treatment.

SUBSTITUTION

In view of the fact that some kinds of seed are short this year we would suggest that customers give, as much as possible, their permission for us to substitute the nearest variety to the one ordered in case we should be sold out. On items of small importance, or during the planting season, when time is precious, we may occasionally send other sorts if out of the ones ordered, but such substitutions may be returned for credit if unsatisfactory to the purchaser.

SCHOOL GARDENS

We wish to encourage the school garden movement and will give a discount on orders placed through any public school.

VEGETABLE SEED SUBJECT TO CHANGE IN EXTREME CASES

We expect to be able to maintain the prices quoted in this catalog, but owing to constantly changing conditions, disturbing replacement values, we must reserve the right to make advances on such items as might otherwise be sold at a loss.

HELPFUL SUGGESTIONS

We are always willing to offer any assistance in our power regarding culture, best varieties for your soil and market, etc. We will also be glad to consider any suggestion you may wish to make to us regarding our catalog, service, seeds, etc.

FERTILIZERS

We have taken the agency at Portland, Oregon, for the Marine Products Company of Tacoma, Wash., and will carry in stock their various lines of high-grade organic Fertilizers. These products have proven very successful among some of the largest fruit and vegetable growers of the Northwest. In these days of high labor costs, fertilizers should be more used. When larger crops can be produced without additional labor cost, fertilizers are a splendid investment. Then, too, larger and better grades can be produced, which will command better prices.

VEGETABLES

ARTICHOKE

Large Green Globe—The green buds are used. Start in hotbeds. Pkt., 20c—oz., \$1.25.

Jerusalem—The tubers are used for stock feed. See section field seeds.

ASPARAGUS

Set the plants about four inches deep and one to two feet apart in rows four to six feet apart. One-year roots are considered by some the best to plant, although other authorities claim it is best to plant the seed where they are to remain in their permanent bed, thinning them to the proper distance apart. The seed is of slow germination and should be planted early in the Spring.

Barr's Mammoth—Very large stalks with close, round heads. Purple-tinted stalks. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.50.

Palmetto—Early and prolific with large shoots, of deep green, slightly tinted with purple at the tips of the stalks. This is the standard sort and most generally planted. Pkt., 5c—oz., 15c—1/4 lb., 35c—lb., \$1.00 postpaid.

Columbian Mammoth White—This large stalked strain produces white stalks above the surface. Pkt., 10c—oz., 20c—14 lb., 50c.

Asparagus Plants, Palmetto—1-Yr. Roots, dozen, 40c—100 for \$1.25, postpaid. E. or F., 100 for \$1.00—1,000 at \$8.00.

2-Year Roots, dozen, 50c—100 for \$1.50, postpaid. E. or F., 100 at \$1.25—1,000 at \$10.00.

DWARF BEANS

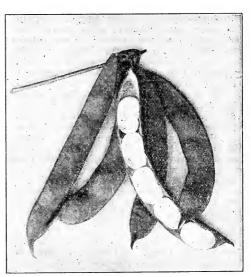

Plant about May 1st for early beans, as soon as the ground becomes warm, in light loamy soil. Large seeded beans require warmer weather to germinate than small beans. Cover from $1\frac{1}{2}$ to 2 inches deep, according to weather conditions. Never cultivate or hoe beans when the foliage is damp from dew or rains, as it will produce rust.

*Challenge Dwarf Black Wax—The earliest wax podded bean. Curved pods of medium size, of clear waxy yellow. Cooks very tender and free from strings. A heavy yielder, which we can recommend.

Very free from strings and equal in quality to Burpee's Stringless Greenpod. Pkt., 15c—½ lb., 25c—lb., 40c—E. or F., lb., 35c—10 lbs., 25c lb.

*GILL'S RELIABLE—This popular bean has no doubt been handed down from pioneer days, as it is found under various names throughout the Northwest. We have grown this bean over thirty years, but never knew the correct name and, although we have made several efforts to locate its true identity, we have not succeeded and so call it Gill's Reliable. It is remarkably prolific and hardy, having few superiors, either as a string or dry bean. The pods are green and the seed pure white. Unless picked very young, the pods need stringing. Very fine for canning and a good all around bean. Pkt., 15c—½ 1b., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 25c lb.

*PENCIL POD BLACK WAX—Hardy and prolific and of finest quality. The pods are bright waxy yellow, long and round and entirely free from strings. Desirable for home or market and very valuable for canning. We consider this the heaviest yielder of the dwarf wax beans. Pkt., 15c—½ 1b., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 25c.

Oregon Lima Beans

LONGFELLOW—Handsome green pods, 7 to 8 inches long, straight and round and nearly stringless. Exceptionally hardy and productive; valuable for market gardeners, especally where a shipping variety is desired. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 25c lb.

DWARF BEANS—Continued

*BURPEE'S STRINGLESS GREEN POD—We consider this the best early bush bean we have ever tried. The pods are green, of good length, entirely stringless, tender and brittle and remain so until nearly ripe. This brown-seeded bean is both early and hardy and one of the richest flavored beans of all. A poular market or garden bean and desirable for canning or drying. Pkt., 15c—½ 1b., 25c—lb., 35c. E. or F., lb., 30c—10 lbs., 25c lb.

*Dwarf Horticultural or Cranberry—A rich flavored early bush bean generally used as a green shell bean; vigorous and prolific. Seed and pod striped and blotched with red on white. This class of beans should be more grown, as they are very rich flavored, either green or dry for winter. Pkt., 15c—1/2 lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 25c lb.

*Davis Wax—Popular with shippers, light yellow pods, seed white. Poor quality unless picked young. It is grown in large quantities for long distance shipments. Exceptionally hardy and also desirable when dry, as the seed are white and nearly as large as White Kidney Beans. Pkt., 15c—1½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 30c lb.

*Refugee, or One Thousand to One—Valuable for pickling and canning. Pods about 5½ inches long, medium green when in condition to use as snaps. This is a heavy yielding variety and gives good satisfaction. Pkt., 15c—½ lb., 25c—lb., 35c. E. or F., lb.,

30c—10 lbs., 25c lb.

Use our general fertilizer for beans. It will nearly double the yield.

POLE BEANS

*OREGON GIANT (Dickinson's Yount)
—This grand bean, the giant of the bean
family, will grow pods one foot in length
and one inch in diameter.

It is a mild flavored bean of exceptional value for home or market. The quality is superb, either for canning, drying or used as a fresh string bean, while it has no superior as a salad bean.

The pods are light yellowish green, striped with deep carmine. When cooked, the stripe disappears, and you have a remarkably tender bean of delicious flavor. When canned whole and served with mayonnaise dressing they top the whole list of beans for salad purposes. It matures very early. Owing to weather conditions at harvest time our crop of this variety was nearly a failure. Pkts. only, 25c each.

*Kentucky Wonder Wax—This grand new pole bean is a wax podded Kentucky Wonder and many think it is of better flavor. We believe it is a more vigorous grower and will yield fully as heavy as the Kentucky Wonder. The pods are a light yellow, extra large, broad and long and cook very tender. Matures quite early. Pkt., 15c—1½, 1b., 25c—1b., 45c. E. or F., 1b., 40c—10 lbs., 35c lb.

*True Asparagus—While the Kentucky Wonder Bean is often known and sold for the Asparagus Bean, this is the true Asparagus variety. The pods are fully as long as the Kentucky Wonder, but more slender and richer in flavor. Seed light drab color. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 30c lb.

*Kentucky Wonder—This is the old standby and is no doubt the heaviest yielder of all beans. Often sold as Asparagus bean. A string bean with long green pods and light brown seeds. It cooks tender and is a good all-around bean. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 25c lb.

*LAZY WIFE, a popular late pole bean which produces heavy yields, broad thick fleshy pods, entirely stringless, 5 to 6 inches long. Use as a snap bean or dry for winter. They have an exceptionally rich buttery flavor. Pkt., 15c—½ lb., 25c—lb., 45c. E. or F., lb., 40c—10 lbs. 35c lb.

*London Horticultural or Cranberry Pole Bean—Pods green streaked with red. Excellent used green, shelled or dry. Pkt., $15c-\frac{1}{2}$ lb., 25c-lb., 40c. E. or F., lb., 35c-10 lbs., 25c lb.

SHELL BEANS

*OREGON LIMA—A large pole lima, exceptionally early and the best for the Northwest. It is fully acclimated and will mature ripe pods 75 days from planting. Excellent either as a butter bean or stored dry for winter use. Seed very large and pure white. Pkt., 20c—½ lb., 30c—lb., 50c. E. or F., lb., 45c—10 lbs., 35c lb.

*Red Mexican—Acclimated seed of this popular early red bean. Pkt., 15c—lb., 30c. E. or F., lb., 25c—10 lbs., 15c lb.

*Self Seasoning—This remarkable bean is so rich in flavor that it does not need any seasoning except salt. The plants are of the bush type, the seed being yellow-green and about the size of the Lady Washington. Seed scarce. Pkts. only, 20c—6 for \$1.00.

*Yellow Swedish—An early, heavy yielding variety, with brownish yellow seed, about the size of Lady Washington. Flavor very rich and excellent for baking. Pkt., 15c—½ lb., 20c—lb., 30c. E. or F., lb., 25c—10 lbs., 20c lb.

SHELL BEANS—Continued

*Boston Pea Bean-Various sorts sold as White Wonder, Mexican Tree Bean, etc., are apparently the same. The plants do not run to vine and ripen early, producing a heavy yield of pure white beans somewhat smaller than Lady Washington. This is the best small white bean for

commercial growing in the Northwest. Pkt., 15c-lb., 30c. E. or F., lb., 25c-10 lbs.,

20c lb.

*Lady Washington-We offer seed of this bean that has been grown several seasons in Oregon and is fully acclimated. Pkt., 15c-1/2 lb., 20c-lb., 30c. E. or F., lb., 25c -10 lbs., 15c lb.

*White Lental Beans-Small seed of glistening white and about the size of Pearl Vetch. They ripen early and even and rank at the top for flavor. Pkt., 15c-1/2 lb., 25c —lb., 40c. E. or F., lb., 35c—10 lbs., 30c lb.

TABLE BEETS

Plant in rows 3 feet wide, with drill, April 1st to June 1st. Thin to 3 or 4 inches apart for table beets and 8 to 12 inches for mangles. For winter beets the latest sowing is best.

*EARLY MODEL-The best all around table beet for home or market. Is extremely early, of smooth, uniform shape. The flesh is dark red, entirely free from strings or core and unusually sweet. By years of careful selection we have perfected this strain until it has no equal. Pkt., 10c—oz., 20c-4 lb., 60c. E. or F., lb., \$1.75.

Detroit Dark Red-A fine beet for market or home garden. Roots of medium size, nearly round and very uniform; flesh blood This variety is in large demand by the canneries. Pkt., 5c—oz., 15c—¼ lb., 40c —lb., \$1.25; postpaid. E. or F., lb., \$1.20.

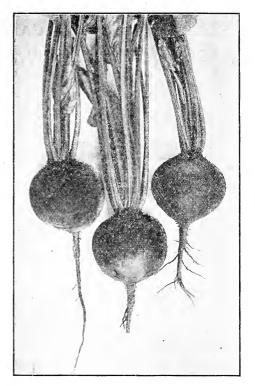

Extra Early Egyptian-The earliest table beet, roots dark red, somewhat flattened in form. Much grown by gardeners for the first spring beets. Pkt., 5c—oz., 15c—¼ lb., 35c—lb., \$1.00. E. or F., lb., 95c.

Long, Smooth Blood Red-Long roots of fine quality. Deep blood red color. Pkt., 5c—oz., 15c—¼ lb., 35c—lb., \$1.00. F., Ib., 95c.

SUGAR BEET

Klein Wanzleben-The best variety for making sugar. The government is now furnishing information on home sugar making and this is worthy of consideration in these days of short sugar supplies. If you do not have the desired information, write to your agricultural college or county agent. Pkt., 10c—oz., 20c—¼ lb., 45c—1 lb., \$1.00.

*OREGON GROWN SEEDS Those varieties which are local grown and acclimated are indicated with a star.

Early Model Beets

MANGEL BEETS

Prices on Mangels uniformly. Pkt., 10coz., 15c—¼ lb., 30c—lb., 60c; postpaid. E. or F., lb., 55c—10 lbs., at 50c lb.

Golden Tankard-A smooth, yellow-fleshed mangel of large size, growing largely above ground, making it easy to harvest. A good yielder.

Mammoth Prize Long Red-The standard red sort, with roots often growing two feet

Giant Half Sugar-Cross between a mangel and sugar beet. Flesh white and exceedingly rich.

Giant Intermediate—Heavy cropper, roots yellow, flesh white. Grows nearly one-half out of the ground.

Danish Sludstrup-Long, reddish-yellow, grows well above the ground and is easy to pull. Awarded first-class certificate by the Danish government.

SWISS CHARD

Lucullus-Grows about two and a half feet high. The heavy stalks are over an inch thick and bare for more than a foot of their length. Should be served as you would asparagus. The leaves make the finest of "greens." Swiss Chard is hardy, easily grown, and should be in every garden. Pkt., 10c—oz., 20c—¼ lb., 60c—lb., \$1.75.

CABBAGE

Early varieties should be started in cold frame in January or February, or sowed the fall previous. They can be grown in a hotbed, but this is not so good, as the plants become tender. The earliest cabbage can be grown by sowing seed in August or early September, then transplant to the field in October. For late, plant seed in open ground May 1st, transplant June 15 for fall and July 1st to 20th for winter cabbage, in rows 3½ feet apart, from 26 to 42 inches in the row, according to the richness of the soil and size of variety. Do not crowd them. They do best in a rich, loamy soil, fertilized with barnyard manure of any kind and applying our cabbage fertilizer as directed.

*GILL'S OREGON BALL HEAD—The acknowledged leader among Northwest growers for a main crop winter cabbage. We have developed this strain until it excels all others for solidity, resistance to aphis or freeze injury. It is unquestionably the best cabbage for crating or general market purposes. The outer leaves are deep green and will hold their color weeks after cutting. It is the best keeper of all, and every plant will head solid if given half a show. We have hundreds of growers who buy this every season. Pkt., 15c—oz., 75c—1/4 lb., \$2.00—lb., \$7.00.

*Danish Roundhead—About two weeks earlier than Oregon Ball Head. The heads are larger and in demand for kraut purposes. It does not withstand aphis or freezing like Oregon Ball Head. Our seed

is from carefully selected heads.

*Glory of Enkhuisen—The best variety for summer or early fall crops, for its tendency is to produce large heads even in dry weather. It can also be used for early spring crops. It is not satisfactory as a winter cabbage. The heads are very brittle and sweet.

*Early Jersey Wakefield—This old standby still holds front rank as a first early cabbage. Its cone-shaped heads mature very quickly and are unusually sweet and brittle. Our strain of this seed is very true to type and superior to that generally oftered.

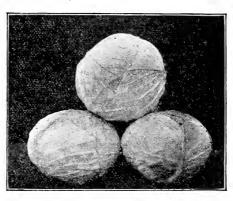

Extra Early Express—Five to seven days earlier than Early Jersey Wakefield, producing pointed, firm heads of good size.

*Surehead—The heads are large, round, flattened at the top, remarkably uniform, extra firm and of fine texture. They weigh 10 to 15 pounds and are especially adapted for kraut. Season same as Premium Flat Dutch.

CHICORY

Large Rooted—Chickory does extra well in this climate and is considered by many as an excellent substitute for coffee. Plant like carrots. Pkt., 10c—oz., 40c; postpaid.

Witloof or French Endive—The roots of this variety are transplanted and bleached for winter use as a salad. They are also cooked like Endive. Pkt., 10c—oz., 40c.

Gill's Oregon Ball Head

*Premium Late Flat Dutch—Uniform large, flat heads, firm and of high quality. Especially suited for home use and kraut.

*Large Wakefield, or Charleston—Similar to Jersey Wakefield, but half again as large and 10 days later.

*AII Head Early—A second early, flat headed sort, very sure heading and little subject to bursting. Extra fine for kraut. Very desirable for fall and early winter.

*Early Winnigstadt—Later than Jersey Wakefield, good either for summer or winter. Small pointed heads and very sweet. Perfection Drumhead Savoy—Curly, crin-

kled leaves; sweet and of fine texture.

Mammoth Rock Red—The best red cab-

bage; hard heading and large. Fine for cold slaw.

Copenhagen Market—Popular with gardeners. Similar to Glory of Enkhuisen.

PRICES ON CABBAGE SEED are uniform as follows, unless otherwise noted: Pkt., 10c—oz., 50c—1/4 lb., \$1.50—lb., \$5.00; postpaid.

BRUSSEL SPROUTS

*Odense Market—Hardy and easy to grow in this climate. They can be used all winter long and find ready sale at good prices. This variety grows dwarf and produces close, round heads. Pkt., 10c—oz., 40c—1/4 lb., \$1.00—lb., \$3.50.

For Cabbage and Cauliflower, use General Fertilizer, also Fish Guane. See fertilizer section.

CAULIFLOWER

For early Cauliflower the same culture as for early cabbage may be used. For late cauliflower, in the description of the varieties offered, the time of planting seed and plants is given. Cauliflower does best in a rich, loamy soil, not a cold, wet location. Plant 2½ to 3½ feet in rows, and 3½ feet between rows. As soon as the heads are large enough to soon be exposed to the light, tie or break the leaves carefully over the head to keep the light away from them. Great care should be used in growing plants of any of the early sorts, that they receive no severe check in their growth, as this will cause them to produce premature heads. Success can be had with the early varieties by planting the seed in the field where they are to grow, even as late as July 10. However, the soil should be thoroughly prepared and several seeds put in a hill, thinning them down to one plant when they have reached transplanting size.

GIANT EASY BLANCHING-We have given this new cauliflower several tests and now introduce it for the first time to our We consider it the finest cauliflower for market gardeners and believe it will take the lead when once tried out. The large heads resemble Gilt Edge or Mt. Hood Snowball. The leaves are nearly twice as long and curl over the head, making them practically self-protecting. It is a strong, vigorous grower and in a test last season (1920) along with Dry Weather, Gilt Edge, Mt. Hood Snowball and Best Early it produced a 25 per cent better crop than these varieties. It was freer from disease and produced very uniform heads. Gardeners who saw it growing immediately placed orders for seed and no grower who specializes with cauliflower should overlook ordering this variety. Order early to be sure of getting the seed. It's self protecting habit, insuring fine white heads at less cost, will render a great saving to growers.

Plant the seed June 1 to 10, and transplant July 15 to 25 for Portland district. The heads are solid and heavy and well suited for shipping in crates or hauling direct to market. Pkt., 25c—¼ oz., \$2.00—oz., \$6.00—¼ lb., \$20.00.

Danish Giant Dry Weather—The best sort for September markets. Extremely hardy and withstands dry weather better than other sorts. The large, pure white heads are heavy and compact. They mature through a long season and when ready stand for several days without spreading. The leaves are quite tall and somewhat self protecting.

For early fall use, plant the seed about April 15th, and transplant about June 15th; for late fall, plant the seed May 10th and transplant about July 10th to 20th. Pkt., $20c-\frac{1}{4}$ oz., \$1.00-oz., $$3.00-\frac{1}{4}$ lb., \$10.00-oz.

Select Early Snowball—We have an especially good strain of this standard early cauliflower and can recommend it very highly. Pkt., 20c—¼ oz., \$1.00—oz., \$3.00—¼ lb., \$10.00—lb., \$35.00.

Burpee's Best Early—Large, solid, white heads, heavy and of exceptional quality. Market gardeners are fond of this variety. For October use, plant seed June 10th and transplant July 20th. We have grown this cauliflower several years and recommend it highly. Pkt., 25c—1/4 oz., \$1.50—oz., \$5.00—1/4 lb., \$16.00.

Giant Easy Blanching

Gilt Edge or Mt. Hood Snowball—Similar to Burpee's Best Early, but larger and produces heavier heads. The flower is quite smooth and regular and pure white when blanched. For fall use (October cutting) plant the seed June 1st to 10th and transplant July 15th to 25th. Pkt., 25c—1/4 oz., \$1.50—oz., \$5.00—1/4 lb., \$16.00.

Veitch's Autumn Giant—A hardy, tall-growing cauliflower, making extra large, white heads. The leaves are dark green, and being extra long can easily be broken over the heads to protect them. It stands handling and shipping better than other varieties. Remarkably vigorous and thrifty. For late cauliflower, season of October, November and December, sow seed in open bed May 1st, transplant July 1st to 15th. Pkt., $15c-\frac{1}{2}$ oz., 80c-oz., $$1.50-\frac{1}{4}$ lb., \$5.00.

Large Algiers—Matures ahead of Veitch's Autumn Giant, with similar growth. Pkt., 15c—½ oz., \$1.00—oz., \$1.75.

BROCCOLI OR HARDY

Mammoth White Broccoli—A late variety, season December to February. Long, tapering, heavy ribbed leaves, inner leaves curling about the head. While considered a broccoli, it is really only a late cauliflower. Brings fancy prices, but the grower must take chances on freezing in the northern part of the state. Pkt., 15c—1/4 oz., 50c—oz., \$1.50—1/4 lb., \$5.00.

BROCCOLI—Continued

MID-WINTER—This new English Broccoli matures during January and February. The solid white heads cook tender and sweet, and are produced on rather dwarf plants. They are quite hardy, but will not withstand severe freezing, followed by Chinook winds. Pkt., 15c—1/4 oz., 65c—oz., \$2.00—1/4 lb., \$6.00.

ST. VALENTINE SPECIAL—The best sort for spring shipment, the solid, handsome white heads being of immense size and ready in February. It is extensively grown around Roseburg, Oregon, for Eastern shipment.

This special strain is grown for us by a large, successful grower, the seed being saved from only the best heads true to the desired type. This selection has been carried on for several seasons. Only hardy plants with a strong tendency to self protection were saved, and we believe we have one of the best strains available. Pkt., 15c-4, oz., 50c-oz, 1.50-4 lb., 5.00-lb, 17.50.

Sutton's Late Queen—Exceptionally late, heading in May and June. It will stand quite severe winters and matures so late that it comes just ahead of early cauliflower. It brings good prices. Pkt., 15c—1/4 oz., 65c—oz., \$2.00.

CELERY CABBAGE

Wong Bok—A delicious new salad vegetable from China which is excellent for salads and cold slaw, and is sometimes used like Swiss Chard. The stems can be used like celery. This vegetable is making good, both for market and home gardens. For best results, plant the seed in August and transplant in September. It can also be planted in early spring. Those who appreciate a delightful and refreshing salad should grow some of this in their garden. Use plenty of our general fertilizer to secure a quick, strong growth. Pkt., 10c—14 oz., 25c—oz., 50c—14 lb., \$1.50—lb., \$5.00.

CRESS

Fine Curled (Pepper Grass)—Grows quickly from seed. Sow thinly in drills. Should be planted at intervals as it runs to seed quickly. Pkt., 10c—oz., 20c—¼ lb., 50c.

Water Cress—Suitable for damp or wet locations. Pkt., 10c—oz., 60c.

For years, as market gardeners, we specialized in growing cabbage and cauliflower. The seed we offer represents years of experience in these crops.

CELERY

GOLDEN SELF BLANCHING—French Grown. We offer a fine strain of this variety. The thick, solid stalks are a deep creamy yellow and their flavor is unsurpassed. They are unusually free from strings and very solid, tender and brittle. This is the variety most generally grown for the market. Pkt., 15c—14 oz., 60c—oz., \$1.50—14 lb., \$4.50—lb., \$15.00.

Golden Self Blanching American—A splendid strain of this variety grown in the United States. Many market gardeners use this seed with great success. Pkt., 10c—1/4 oz., 25c—oz., 80c—1/4 lb., \$2.25—lb., \$8.00.

EASY BLANCHING—The habit is dwarf and compact, with light green foliage. A second early variety; good to follow Golden Self Blanching. It is easy to blanch and the flavor first class, while the stalks are pure white, heavy and crisp. Pkt., 19e—1/2 oz., 35c—oz., 60c—1/4 lb., \$1.80—lb., \$6.00;

CORN SALAD

Large Seeded—Sow in spring in drills one foot apart; it will mature in 6 or 8 weeks. For winter and early spring use, sow in drills in August and September. Three ounces to 100 feet of dril¹ Pkt., 10c—oz., 30c—1/4 lb., 90c.

Giant Pascal—Extra large growing sort for fall and winter use and planted very extensively. Blanching yellowish-white in color. Stalk tender and crisp. Pkt., 5c—oz., 35c—¼ lb., \$1.00; lb., \$3.50.

White Plume—We carry a fine strain of this popular first early celery. The stalks bleach very tender and snow white. Pkt., 5c—½ oz., 25c—oz., 45c—½ lb., \$1.25—lb., \$4.25.

CELERIAC, or Turnip Rooted Celery—Large Smooth Prague—The roots are turnip shaped and are used for soups and stews. They are very hardy and will stand in the open all winter in the coast regions. Cultivate the same as celery, except they should not be blanched. Pkt., 10c—oz., 25c—1/4 lb., 80c.

HORSERADISH

Common variety, 50c doz—\$1.75 per 100; postpaid. By E. or F., 35c per doz—\$1.25 per 100—\$9.00 per 1000.

GARLIC

Common—Plant the sets very early in the spring. ½ lb., 25c—lb., 45c; postpaid.

Use our potato fertilizer for carrots. The use of proper fertilizers is an investment—not an expense.

CARROTS

Carrots may be planted from March to June. We prefer to plant from May 10 to 25; they will then miss many of the spring weeds and will stand through the dry season better, making a better quality of roots. Those who plant any quantity should use a good drill, as it lessens the work and gives a more even stand. As soon as they are up use a wheel hoe, following this with a harrow tooth cultivator.

Early Scarfet Horn—An early variety with small tops and roots about three inches long and rather top shaped. Valuable for very early crop out of doors. Color, deep orange. Pkt., 10c—oz., 20c—¼ lb., 50c—lb., \$1.35.

CORELESS, or Scarlet Nantes—The roots are bright orange, 5 to 6 inches long and very uniform. They have very small core and are exceptionally tender and sweet. The roots are rather slender, of even diameter and of early maturity. Very desirable for market, especially for bunching, and also splendid for the home garden. Pkt., 10c—oz., 20c—14 lb., 50c—lb., \$1.50.

*CHANTENAY—This variety is the best carrot for all-round purposes. The roots are very smooth, stump-rooted and somewhat thicker at the tops. It is early and produces immense crops; records of 50 tons per acre have been secured. It will stand more crowding than other sorts. The best variety for table use and very popular with canners and dehydrating factories. On account of its heavy production and superior quality it is also grown for feeding purposes. Pkt., 10c—oz., 20c—1/4 lb., 45c—lb., \$1.25.

*Danver's Half Long—The standard stock carrot, but we do not recommend it for table use, as compared to the Chantenay. It is a heavy yielder and is largely planted. Our strain of it is extra good. Pkt., 10c—oz., 20c—¼ lb., 40c—lb., \$1.25; postpaid.

Oxheart—A favorite table sort. Yields heavy crops of smooth short roots. A variety that is easy to harvest. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 40c—lb., \$1.25; postpaid.

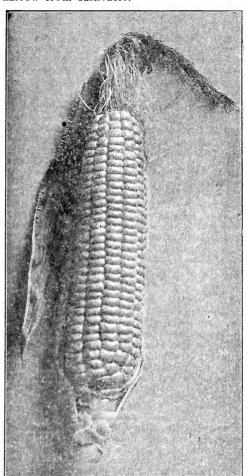

Long Orange—Suited for deep soils; long red roots for stock feeding. Pkt., 10c—oz., 15c—¼ lb., 40c—lb., \$1.25; postpaid.

Large White Belgian—Long-rooted white stock carrot; very heavy yielder. Pkt., 10c—oz., 15c—1/4 lb., 35c—lb., \$1.00.

*Improved Short White—Short, thick roots that taper to a point. Easy to harvest and a good yielder. Pkt., 10c—oz., 15c—14, 1b., 35c—lb., \$1.00.

BIG FOUR COLLECTION SWEET CORN

Secure a succession of sweet corn by planting one packet each of the following: Gill's Early Market, Portland Market, Improved Golden Bantam, and Howling Mob. All for 50c, postpaid.

Gill's Improved Golden Bantam

ENDIVE

Culture similar to lettuce. The outer leaves should be tied over the head to bleach.

Large Green Curled—One of the best sorts. Pkt., 10c—oz., 20c—1/4 lb., 50c.

EGG PLANT

Start in hot beds like tomatoes; avoid any checks in growth. Set 2½ feet in the rows and 3 feet between.

Black Beauty—The earliest and best of the large fruited varieties. Color rich, lustrous purplish black. Pkt., 10c—½ oz., 40c—oz., 75c—¼ lb., \$2.25.

SWEET CORN

The first requisite for success with corn is acclimated seed. Note those with star. Prices paid for first early corn will pay the grower to take chances on early planting. For this planting use 4 or 5 seeds per hill and cover one inch deep. Space hills 28 to 36 inches, and rows 3½ feet, allowing two stalks to the hill, or as some prefer and we think this gives the best results, plant 15 inches between hills, and thin to one stalk; this gives all the stalks an even show. April 20 to May 1 is generally good season for early corn; of course, depending on the weather. May 15th to 25th is good for the later sorts, as they do not resist damp, cold weather so well as the early sorts.

Corn will not fill well unless the patch planted is blocked out; those planting small quantities should make the patch square, or nearly so. This will permit the pollen to blow down on the silk, fertilizing the ears. Early corn may be planted in succession up

to June 25.

*GILL'S EARLY MARKET-This remarkable first early corn of our own introduction is fast becoming recognized as a leader all over the Northwest. We developed this strain from Portland Market through a selection for earliness. We honestly believe there is not another true sweet corn in existence so early as this variety, surely none so large and of such high quality. Our selections on this corn are being continued year after year and today it is practically as large as Portland Market. It has been grown in North Dakota, New York and Maine and from each state we have reports that it is the earliest and best sweet corn they have tried. It is 10 to 14 days earlier than Portland Market. The immense ears are well filled with large, sweet, plump, white grains set 12 to 14 rows to the cob. By planting this variety you will beat all other varieties in your neighborhood. On account of its extreme earliness and large size, market gardeners get very profitable prices. For earliest results, use plenty of fresh horse manure and our general fertilizer. Pkt., 15c—½ lb., 25c—lb., 45c; postpaid. E. or F., lb., 40c— 10 lbs., 35c lb.

*HOWLING MOB-In most sections of northern Oregon, Idaho and Washington the Evergreen varieties are too late of maturity to give satisfaction and this variety is fast taking the place of the Evergreen strains. The ears are very large and filled tightly with medium sized grains of pearly whiteness. There are usually 12 to 16 rows to the ear. The plants are six to seven feet tall, strong and vigorous, producing two or more ears; usually a few days later than our Improved Golden Bantam. The grains are very tender and sweet; in fact, we consider it the sweetest of the white varieties. Successions may be planted from May 15 to June 15. We are improving this variety very much by our careful selections each season. Pkt., 15c-½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 30c lb.

Country Gentleman—A popular late sort. Sometimes called "Shoe-peg Corn." Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs., 30c lb.

*GILL'S PORTLAND MARKET—Introduced by us ten years ago, this is now the leading early corn and is the largest of all early varieties. Its immense size, together with its large, sweet, plump grains of purest white, on well filled ears, make it a ready seller on any market. The large ears, often a foot in length, mature very even, and owing to the thin husks the marketable ears are easy to detect. The stalks grow strong and vigorous, but rather dwarf. Pkt., 15c—½ lb., 25c—lb., 45c; postpaid. E. or F., lb., 40c—10 lbs., 35c lb.

*GILL'S IMPROVED GOLDEN BANTAM—Superior to the original Golden Bantam in quality and nearly twice the size. Nearly all ears carry 10 to 12 rows of rich golden yellow kernels, set close upon the cob. Do not compare this with the original strain, as it is far superior in every respect, and any gardener who places this corn on the market will command better sales and prices.

It has no superior for market, table, canning or drying. We carry the exclusive seed of this improved strain. Remember, we are improving this variety every year and if you wish the up-to-date selection, buy direct from us each year. Pkt., 15c—½ lb., 25c—lb., 45c. E. or F., lb., 40c—10 lbs., 35c lb.

Early Evergreen—While this is not a first early corn, this strain is considerably earlier than Stowell's Evergreen, which in general character it resembles. Pkt., 15c—½ lb., 20c—lb., 35c; postpaid. E. or F., lb., 30c—10 lbs., 25c lb.

Stowell's Evergreen — The popular late sweet corn. Often planted for fodder. We have a true strain of this seed. Pkt., 15c —½ lb., 20c—lb., 35c; postpaid. E. or F., lb., 30c—10 lbs., 20c lb.

POP CORN

*White Rice—The best commercial pop corn. Sharp pointed grains. Our seed is fully acclimated. Pkt., 10c—½ lb., 20c lb., 35c. E. or F., lb., 30c—10 lbs., 25c lb.

Our General Fertilizer will produce immense yields of corn where properly applied.

FIELD CORN

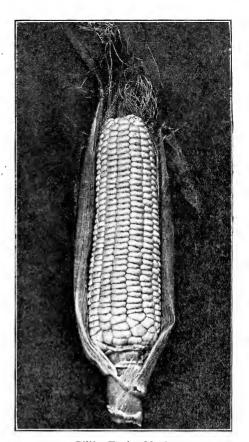

The growing of field corn has now reached a stage where it is past being an experiment, and with acclimated seeds of any of the good, earlier sorts there is no difficulty to obtain success. We do not and will not handle any but local grown seed of field corn, and our customers may feel sure of getting the right seed. Write for prices on quantities. All varieties offered have been carefully tested for germination and are above standard of law.

*ALBANY HYBRID—This variety is a cross between Minn. No. 13 and Pride of the North. It has the earliness of the No. 13, and the deep grain and small cob of the Pride of the North. It has been given careful attention in selection and is, we believe, one of the finest sorts for grain or ensilage. ½ lb., 15c—lb., 30c. E. or F., lb., 25c—10 lbs., 20c lb.—100 lbs., 17c lb.

Minnesota No. 13—An early variety well suited to the Northwest. Grains golden yellow, deep and heavily dented. Tal! stalks well suited for ensilage. ¼ lb., 10c—lb., 25c; postpaid. E. or F., lb., 20c—10 lbs., 17c lb

*GOLD NUGGET—The earliest Dent corn we know of for this climate. Golden yellow grains, on large, heavy ears. This has proved to be the most desirable variety for dry corn or ensilage, owing to its earliness. 14 lb., 10c—lb., 25c. E. or F., lb., 20c—10 lbs., 17c lb.

*OREGON WHITE DENT—Extra large ears with broad white grains. This variety has been grown in Oregon for several years with fine success and is early enough to reach maturity every season. Pkt., 15c—1b., 30c. E. or F., lb., 25c—10 lbs., 20c lb.

Gill's Early Market

CUCUMBERS

Plant 4 feet each way in rich, loamy soil, from April 15 to June 1, 8 to 10 seeds to hill; thin to three good vines. Cover seeds one inch deep and press firm.

DAVIS PERFECT—This new cucumber is taking front rank for a garden or slicing cucumber. The most vigorous and thrifty grower we have tried. Produces a heavy yield of uniform, long, dark-green cucumbers. Holds its color good after marketing. Popular sort for greenhouses, and especially desirable for home gardens and market gardeners. Pkt., 10c—oz., 20c—1/4 lb., 60c—lb., \$1.75, postpaid.

EARLIEST OF ALL—Claimed to be the earliest variety. An exceptionally vigorous grower that produces immense crops of handsome cucumbers of medium length, desirable for slicing and pickling. Pkt., 10c—oz., 25c—1/4 lb., 60c—lb., \$1.75.

Perfection White Spine—There are many strains of White Spine, but we consider this the best. A splendid slicing cucumber. Pkt., 5c—oz., 15c—¼ lb., 40c—lb., \$1.25.

White Wonder—Large, creamy white cucumbers of mild flavor, suited for slicing. Pkt., 10c—oz., 25c. Improved Long Green—Extra long, large cucumbers; fine for slicing, pickling or for sweet pickles when ripe. A very vigorous and healthy grower. Pkt., 10c—oz., 20c—14 lb., 50c—lb., \$1.50; postpaid.

Thorburn's Everbearing—Uniform cucumbers of medium size, especially suited for pickling. It is early, prolific and has great endurance. Pkt., 10c—oz., 20c—¼ lb., 50c—lb., \$1.50.

Boston Pickling—The most generally planted for pickles through this section. Medium sized and a vigorous grower. Pkt., 5c—oz., 15c—14 lb., 40c—lb., \$1.35; postpaid.

Small Gherkin—A small prickly variety used only for pickles. Cucumbers small and round oblong. Very prolific and bear through a long season. Pkt., 10c—oz., 25c—1/4 lb., 75c.

Lemon Cucumber—Resembles a lemon, both in color and form. A splendid acquisition, either for pickling or slicing. Pkt., 10c—oz., 25c—¼ lb., 60c; postpaid.

KALE, EDIBLE

Culture, same as that of cabbage.

Tall Green, Scotch Curied—Tall and finely curled leaves. Pkt., 10c—oz., 20c—¼ lb., 60c—lb., \$2.00; postpaid.

Dwarf German—Finely curled, low growing. Pkt., 10c—oz., 25c—¼ lb., 60c—lb., \$2.00; postpaid.

Georgia Collards—Valuable as greens for table use and for stock feeding. They grow 2 or 3 feet tall and form loose, open, cabbage-like heads. They will withstand our winters and can be used all winter long. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.75.

KALE FOR FEEDING

*SELECT THOUSAND HEADED—This is a carefully selected strain that produces enormous yields. We have many letters testifying to the value of this strain of seed. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.50; postpaid.

*Common Thousand Headed—This is the grade of seed usually sold, and while not equal to the selected strain, will give good results. Pkt., 5c—oz., 15c—¼ lb., 25c—lb., 75c; postpaid.

*GIANT MARROW—Enormous plant on tall, heavy stalks. The leaves are very broad and heavy and combined with the large stems, often 3 inches in diameter, make a heavy yield of feed. Pkt., 10c—oz., 25c—1/4 lb., 90c—lb., \$3.00.

*JERSEY KALE—It is claimed that this variety is much larger and a heavier producer of feed than any other sort. Our seed is Oregon grown and is the true Jersey Kale. Pkt., 10c—oz., 25c—¼ lb., 50c—lb., \$1.35.

PARSLEY

*Dark Moss Curled—Dark green mosslike leaves. One of the very best sorts. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 40c.

Hamburg or Turnip Rooted—The roots resemble small parsnips although shorter. Used for flavoring soups and stews. Pkt., 10c—oz., 20c.

KOHL RABI

Early White Vienna—The best for table use. Kohl Rabi should be more grown, as it is a delicious vegetable, cooked like turnips. Transplant like cabbage in July; rows 3 feet wide and 1 foot in rows. Pkt., 10c—oz., 30c— $\frac{1}{4}$ lb., 90c.

MUSTARD

Chinese—Large leaves, sweet and pungent. Pkt., 10c—oz., 20c—¼ lb., 40c—lb., \$1.25; postpaid.

Giant Southern Curled—Large variety with fine curled leaves. Pkt., 10c—oz., 15c—¼ lb., 40c—lb., \$1.25.

MUSHROOM

.Pure culture Mushroom Spaun. Per brick, 40c; postpaid. E. or F., 35c brick.

LETTUCE

Can be planted most any time of the year. Give head varieties plenty of room. Cover one-half inch deep.

HEAD LETTUCE

NEW YORK—The finest head lettuce for flavor; large heads of dark green color, extra tender and brittle. Produce mild heads even in the heat of summer. During the winter months this variety is shipped to our markets from California. While not early, we recommend it for the garden or for main crop market lettuce. Don't leave this off your order if you are fond of good head lettuce. It is very slow to run to seed. Our strain of this seed produces rather round heads, extra large and of deep green color. We have a large trade among gardeners. Pkt., 10c—oz., 50c— $\frac{1}{4}$ lb., \$1.50—lb., \$4.75.

ICEBERG—Produces large heads, which are quite firm, also exceptionally tender and brittle. It blanches very white and is especially suited for home gardens. Pkt., 10c—oz., 25c—1/4 lb., 75c—lb., \$2.50.

Hanson—A popular sort, producing large, firm heads of light green color. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 40c—lb., \$1.25.

Early May King—Extra early; produces large heads noted for their rich buttery flavor. This variety stands early planting and is the leading early sort. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 55c—lb., \$1.75.

Crisp as Ice—It was the most uniform head lettuce in our grounds. Heads compact, of a bronze red color, maturing very even. A beautiful lettuce for the table and should become a good seller. Pkt., 10c—oz., 25c—14 lb., 75c.

Big Boston—One of the best head sorts for fall sowing, as it is exceptionally hardy. Plants large, leaves broad, comparatively smooth, with wavy edge, hard and crisp; color bright, light green, slightly tinged with reddish-brown. Pkt., 5c—oz., 15c—14, 1b., 50c—lb., \$1.50.

LOOSE LEAF LETTUCE

Black Seeded Simpson—Very large loose-leaf lettuce. Light green ruffled leaves. Pkt., 10c—oz., 20c—¼ lb., 50c—lb., \$1.50.

Grand Rapids—The standard hot-house lettuce for forcing, also does fine in the open ground. Loose leaves of a light green color and fringed edges. Pkt., 5c—oz., 15c—¼ 1b., 45c—lb., \$1.35.

Tomhannock—A beautiful loose-leaf lettuce with a reddish-brown border to the edge of the leaf. A quick grower of very tender, sweet leaves, entirely free from bitterness. Can be eaten with relish in the patch. Pkt., 10c—oz., 20c—1/4 lb., 50c—1/2 lb., \$1.35.

CHICKEN LETTUCE

A rough, tall lettuce for feed only. Grows 4 feet high and supplies abundant green feed. Forms no head. Fine tonic for laying hens. Pkt., 10c—oz., 25c—1/4 lb., 75c—lb., \$2.50.

COS LETTUCE

Early White Self-Folding—Leaves yellowish white, crisp and tender; forms sugar loaf heads; bleaches better if tied. Pkt., 10c—oz., 20c—1/4 lb., 60c.

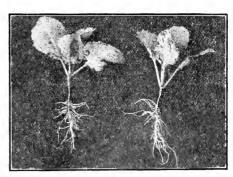

LEEK

Monstrous Carentan—Culture same as onions. Large size. The best. Pkt., 10c—oz., 35c— $\frac{1}{4}$ lb., \$1.00—lb., \$3.50.

Our General Fertilizer gives wonderful results on cucumbers, melons, squash and pumpkin.

CASABAS

Golden Beauty—Bright yellow, about globular in shape and the first to ripen. They will mature in most localities where melons can be grown. Pkt., 10c—oz., 25c—14 lb., 60c—lb., \$1.75.

Wintered-Over, Early Cabbage Plants (See page 21)

HARDY CABBAGE PLANTS

These strong, winter hardened cabbage plants are far superior to frame or greenhouse plants. They are not so nice to look at but they have a splendid root system, and being thoroughly hardened will stand moving and shipping easily. Early cabbage usually bring good prices.

MUSK MELON

Melons require a light, loamy, rich soil in an early location. Plant 4 by 6 feet, giving more room for larger varieties. Use 8 or 10 seeds to the hill; cover 1 to $1\frac{1}{2}$ inches deep. When the first leaves appear thin to two plants. Turn the vines with the row to permit cultivation.

HONEY DEW (Green Flesh)—A distinct new melon, claimed to be a cross between a casaba and muskmelon. Shape round oblong and color nearly white, flesh thick and extra sweet. Can be stored for late fall use, much like a casaba. Pkt., 10c—oz., 25c—14 lb., 75c—lb., \$2.50.

GOLDEN HONEY DEW—Same as the original Honey Dew in shape, texture and flavor, but the flesh is a rich golden salmon color. Pkt., 15c—oz., 40c—1/4 lb., \$1.25—lb., \$4.00.

Original Pineapple—The vines are very vigorous, producing a heavy yield of goodsized, heavily-netted melons, which are somewhat elongated in shape. The meat is thick, sweet and spicy flavored. This early melon should certainly be more planted. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.75.

Emerald Gem—Truly the gem of redfleshed melons. The dark green fruit is of medium size, flattened at both ends. The flesh is thick, sweet and melting, with a rich, spicy flavor. An early melon, well adapted to this section. Pkt., 10c—oz., 20c —¼ lb., 50c—lb., \$1.50.

Early Fordhook—A firm, heavy netted melon, extra early and a heavy yielder. Flesh and flavor much like the Emerald Gem. Pkt., 10c—oz., 15c—1/4 lb., 45c—lb., \$1.50.

Burrell Gem—Splendid shipper; 4 to 6 inches in diameter; seed cavity small, flesh firm and reddish orange. Pkt., 10c—oz., 20c—½ 1b., 50c—lb., \$1.50.

Extra Early Hackensack—Produces melons two weeks earlier than the well-known Hackensack; heavily netted, and has light green flesh of most delicious flavor; a splendid Cantaloupe melon. Large, fine form; grown for the home garden very extensively. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.50.

SALMON TINTED POLLOCK (10-25)—Considered the finest type of commercial melon and very much in demand by shippers. Meat of fine texture, deep and firm. One half of meat next to rine is green while inner half is a rich salmon. Exceptionally good flavor and very attractive. Pkt., 10c—oz., 30c—1/4 lb., 80c—lb., \$2.50.

Netted Gem or Rocky Ford—The standard shipping melon, medium size, with small seed cavity; green meated, spicy and sweet. Will not ripen except in those localities well suited to melon culture. Pkt., 5c—oz., 15c—1/4 lb., 40c—lb., \$1.25.

See the bargain offers on the outside of the back cover.

WATERMELONS

Plant 8 to 10 seeds in hills 6x6. Thin to 2 best vines. Turn vines with the row. Plant May 1st to 20th. Fertilize heavy.

HUNGARIAN HONEY—A small round, thin-rind melon with rich, red flesh. Extra early and sure to ripen even in the coolest season. Those who try it once will always have them in the garden for home use; they are so sweet. Pkt., 10c—oz., 30c—¼ lb., \$1.00.

Preserving Citron — Red-seeded, oval fruits; used for preserves. Pkt., 10c—oz., 20c.

HALBERT HONEY—An early maturing variety suited to Northern States. Produces melons 15 to 20 inches in length with dark green skin and rich carmine flesh of highest quality. Pkt., 10c—oz. 20c—1/4 lb., 45c—lb., \$1.50.

Kleckley Sweets—A medium early melon, 18 to 20 inches long and 8 to 10 inches thick; one of the sweetest watermelons. Good for near market. Pkt., 10c—oz., 15c—14 lb., 45c—lb., \$1.25.

ONIONS

A rich loam is best, fertilized with well rotted manure and onion fertilizer. Sow seed in February or March if the condition of the ground and the weather will permit. Sow with drill in rows 12 to 16 inches apart; cover half-inch deep. Hoe with wheel hoe as soon as they are up, but do not more than scalp the surface, as onions do not stand deep cultivation. Thin them to about 8 plants to the foot. It requires about 3 to 4 lbs. of seed to the acre: Onions are peculiar, in that they do well year after year on the same ground.

*SELECT OREGON YELLOW DAN-VERS—This variety is largely planted through the Northwest. The onions are large, half globe shape with small necks; early and heavy yielders. We handle a strain of this seed, which is grown for us by an onion specialist who has been growing fine onions for several years in Oregon. Onions are a crop where it is imperative that good seed be used and this will give the very best of results. Pkt., $10c-\frac{1}{2}$ oz., 20c-oz., $30c-\frac{1}{4}$ lb., 85c-lb., \$2.50.

*Yellow Globe Danvers — Large globe-shaped onions with small necks. We have secured a good strain of seed. They are quite similar to Oregon Yellow Danvers, except being more globe shaped. Pkt., 5c—oz., 20c—14 lb., 60c—lb., \$1.75.

Large Red Wethersfield—The standard red sort, of large Size, flattened onions of purplish red; very productive and good shippers. Pkt., 10c—oz., 20c—1/4 lb., 60c—lb., \$2.00.

Prizetaker—Extra large onions of mild flavor; globe shaped with small necks; color bright straw. Pkt., 10c—oz., 30c—14 lb., 60c—lb., \$2.00; postpaid.

Australian Brown—An extra early, sure cropping variety, with long keeping qualities. A sweet, mild flavored onion, with crisp, white flesh, covered with a bright reddish-brown skin. Largely used for growing onion sets and equally good for market purposes. Pkt., 5c—oz., 20c—1/4 lb., 50c—lb., \$1.75.

WHITE ONIONS

White Queen—Usually planted thick to produce small pickling onions. Pkt., 10c— $\frac{1}{2}$ oz., 30c— oz., 50c— $\frac{1}{4}$ lb., \$1.25—lb., \$4.00.

White Portugal or American Silverskin—This variety is considered the best of the white onions by many growers and is extensively used for bunching onions. A medium early sort of good size, somewhat flattened in shape, with clear white skin. Pkt., $10c-\frac{1}{2}$ oz., 20c-oz, $30c-\frac{1}{4}$ lb., 75c-lb., \$2.50.

SOUTHPORT WHITE GLOBE—The best keeping white onion. A heavy yielder of handsome globe shaped onions of finest quality. Preferred by many gardeners for green bunching onions. Pkt., 10c—½ oz., 25c—oz., 40c—¼ lb., 90c—lb., \$3.00.

ONION SETS

Bottom Sets—Small onlons grown from seed planted too thickly to reach mature size. They produce green onlons in a short time, or if left to grow will produce nice large dry onlons and earlier than those grown from seed. ½ 1b., 20c—1b., 30c; postpaid. E. or F., 20c—10 lbs. @ 15c.

Top Sets—Produced in clusters. This perennial type is popular. ½ lb., 20c—lb., 35c; postpaid.

Shallots—Desirable for bunching and early crop. The smallest sets make large bulbs, but the larger ones produce a cluster of small and medium sized bulbs. Flesh white and mild. ½ lb., 20c—lb., 35c; postpaid.

Potato Sets—Also called Bottom Multiplier. ½ lb., 25c—lb., 45c; postpaid.

Use of the proper onion fertilizers will not only increase the crop, but will produce earlier maturity and better keeping qualities. Write us.

GARDEN PEAS

Culture—Plant as early as the ground can be worked in the spring. Peas will not reach perfection if planted after May 1st, although they will make a fair crop. They should be well rooted before warm weather begins. If planted during February and March they will mature before the aphis get started.

Write for price on quantity lots greater than those listed here.

EARLY VARIETIES

*EARLY MORN—The peas and pods are equal in size to the Telephone, and mature along with Gradus. The peas are dark green and very sweet, making them one of the best for home use and canning. The vines, which grow about four feet high, are very strong and vigorous, and produce heavy yields. We have a very large trade in this variety and consider it one of the best in our list. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs at 30c lb.

*SURPRISE—New. Positively the earliest wrinkled pea; fully as early as Alaska. Vines 2 feet, pods about the size of American Wonder and fully as sweet flavored as that variety. Beyond question, the earliest and most profitable pea. Market gardeners received fancy prices for these peas last season, and they are enthusiastic about it. It is 7 to 10 days earlier than Gradus. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs, at 30c lb.

*Gradus—A large podded, first early sort extensively grown by market gardeners; in fact this is now one of the leading early sorts for early market. Pkt., 15c—½ lb., 25c—lb., 40c. E. of F., lb., 35c—10 lbs. at 30c lb.

*Alaska, or Earliest of All—Extra early, hardy, smooth seeded sort; 2½ feet high. Pkt., 15c—½ lb., 20c—lb., 35c. E. or F., lb., 30c—10 lbs. at 25c lb.

*Little Marvel—Superior to American Wonder with larger pods and only a few days later. Flavor fully as good. One of the finest dwarf peas. Pkt., 15c—½ lb., 25c—lb., 40c; postpaid. E. or F., lb., 35c—10 lbs., at 30c lb.

*LAXTONIAN—Enormous pods, well filled, on dwarf vines. We recommend this new pea very highly. It is the ideal pea for those who wish large pods on dwarf vines. Peas extra sweet and dark green color. Seed crop very short. Pkt., 15c—1/2 lb., 25c—lb., 45c. E. or F., lb., 40c—10 lbs., at 35c lb.

*THOMAS LAXTON—Similar in growth to Gradus, but the pods are darker green and square at the ends. Exceptionally rich sweet flavor; four days later than Gradus and yields heavier. Pkt., 15c—1/2 lb., 25c—1b., 40c. E. or F., lb., 35c—10 lbs., at 30c lb.

*American Wonder—This old popular sort needs no description. Remarkably sweet flavored and extra early. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 40c—10 lbs., 30c lb.

SECOND EARLY VARIETIES

*Alderman (Dark Telephone)—Many market gardeners object to the true Telephone pea on account of its light green color. In this, we have a pea the same type but with larger and darker colored pods. In quality unsurpassed. Vines strong and vigorous, growing 4 to 5 feet tall and producing immense crops. A few days later than Telephone. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., 35c—10c lbs., 30c lb.

*True Telephone — The standard main crop pea; tall growing habit, vine, pod and peas of light green color; enormous yielder and one of the best sellers on the market. The seed we offer is true Telephone and can be relied upon. Pkt., 15c—1½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs. at 30c lb.

*Bliss Everbearing—Vines about three feet high, producing a good crop of late peas. Peas are very large and sweet. This is a popular old variety. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs. at 30c lb.

*Dwarf Telephone—A vigorous growing, heavy producing sort. Height about 18 inches, pods large and well filled with peas of high quality. Pkt., 15c—½ lb., 25c—lb., 45c. E. or F., lb., 40c—10 lbs. at 35c lb.

LATE VARIETIES

*QUITE CONTENT—Enormous pods, one-third larger than Telephone. The color of pods and peas is dark green. The vines are tall and vigorous, producing heavy yields a week to ten days later than Telephone. This variety found ready sale at good prices on the public market at Portland. The peas are quite sweet and both pods and peas are larger than any variety we have seen. Seed very scarce. Pkts., 15c—1/2 lb., 30c—lb., 50c. E. or F., lb., 45c—10 lbs., 40c lb.

*Improved Stratagem—Medium vines, producing immense pods, filled in with large, dark green peas of finest quality. Strong, stocky vines, 2½ feet high. Pkt., 15c—½ lb., 25c—lb., 40c. E. or F., lb., 35c—10 lbs. at 30c lb.

GIANT SUGAR (Edible Pods)—The large broad pods are 5 to 6 inches long and are cooked like snap beans. Vines grow 5 to 6 feet tall. Pkt., 15c—1/2 lb., 25c—lb., 45c. E. or F., lb., 40c—10 lbs., at 35c lb.

Use our General Fertilizer for peas. It means much larger yields and better quality.

PARSNIPS

Culture same as carrots, except time of planting, which should be about May 1st.

*GILL'S TENDER HEART—On account of the superior quality of this parsnip, our family has retained the seed annually for over thirty years. Unlike other parsnips, the heart is tender, never tough; roots are smooth, hollow crown, thick and heavy at the top, tapering abruptly, making it easy to dig. We have the exclusive seed of this champion garden or market parsnip. Do not fail to try this parsnip, for it is unexcelled anywhere. Crop near failure. Seed very scarce. Pkt., 10c—oz., 25c—1/4 lb., 75c

*Gill's Success—Longer roots than the Tender Heart variety and better adapted to market purposes, as it is not so thick at the crown and will bunch better. The smooth white roots cook tender and sweet. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 50c—lb., \$1.50; postpaid.

PEPPERS

Start plants in hot beds or in pots in a warm room in March. Transplant in open ground May 10 to 20, rows 3½ feet wide, 2 feet in rows.

PERFECTION PIMENTO—This bright scarlet variety has exceptionally thick meat and is the best for pimentos. It is very mild and has a delicious, sweet flavor. Pkt., $10c-\frac{1}{2}$ oz., 45c-oz., $85c-\frac{1}{4}$ lb., \$2.50.

Crimson Giant—Extra large peppers, of beautiful crimson when ripe. Their large size makes them fine for stuffing. It ranks among the earliest and most prolific. Pkt., $10c-\frac{1}{2}$ oz., 45c-oz., 75c.

Chinese Giant—The largest of the mild red peppers and a favorite with gardeners. A little later than Crimson Giant. Pkt., $10c-\frac{1}{2}$ oz., 45c-oz., $85c-\frac{1}{4}$ lb., \$2.50.

Golden Dawn-Golden yellow perper; mild and sweet. Pkt., 10c.

POTATOES

Plant early kinds as early as the ground will work. Late varieties May 20 to June 20. Rows 3½ feet wide, 20 inches in row. Cut to one or two eyes.

*Snow—We have grown this for several years and are well pleased with its yielding qualities. Nearly every potato grows perfect in shape, roundish, slightly flattened, with snow-white skin and flesh. Produces very few unsalable potatoes. Can be planted closer than the Burbank and still produce good size tubers.

*Reliance—This variety will produce from 10 to 30 potatoes to the hill, and is especially adapted to extra rich soils, low lands and dyked tidelands. The tubers do not grow too large and are shaped much like the Burbank. Skin, light brownish white, with white flesh. Good cookers.

*EARLIEST OF ALL—Undoubtedly as early as any potato grown, and we consider it the most desirable early market or home garden potato.

It is superior to the Irish Cobbler which it somewhat resembles, being a better yielder and of stronger vitality. It has exceptional endurance and is the best all round early potato we know of.

SELECTED RURALS—A careful selection from the popular variety of Rural New Yorker so much grown in Idaho. This strain has had several years hill selection and produces potatoes of very smooth and uniform appearance. This variety has great endurance and should be planted early in the season. If planted late they become too large and have a tendency to burst at the seed end.

*Pride of Multnomah—Somewhat similar to the Burbank, but has greater endurance against drought and will yield much heavier.

BRITISH QUEEN (So called White Rose)
—An exceedingly vigorous grower, producing very heavy yields. We do not know of a variety having so much vigor or capacity for heavy production. The potatoes are shallow eyed, round, oblong and very uniform. The skin is white and quality quite good. It has great endurance and should be planted early or second early to secure a crop of nice smooth tubers.

*Netted Gem—Called by some the Russet Burbank. Long shaped tubers, covered with a fine netting. They are of splendid texture and noted for their baking qualities.

*Early Rose—The old favorite, true seed.

Burbank—A standard and popular sort.

produces heavy yields on good soils.

American Wonder—Similar in shape to the Burbank, but eyes are slightly deeper and skin is not quite so white. A very heavy yielder. We have a good strain.

Other Varieties—We are located in a potato growing section and have a wide acquaintance, which enables us to secure other good seed stocks. Write us regarding any variety not listed.

PRICES ON POTATOES

By mail, postpaid, at 20c per lb.; 3 lbs. for 40c. For quantity, please drop us a card.

SWEET POTATOES

Sweet Potato Plants—Ready in May. Per dozen, 50c—100 for \$3.00; postpaid.

POTATO FERTILIZER

Read about our special Potato Fertilizer. Larger yields and better grades are secured by its use.

PUMPKIN

Plant May 10 to 20 in rows 10 feet wide and 8 feet in the row; about 8 or 10 seeds to the hill; thinning to two good plants. Turn vines with the row to permit cultivation. Use 200 lbs. Utah land plaster to the acre, plowing it in.

*ORANGE WINTER LUXURY — This strain, which is the result of years of careful attention, is a decided improvement over all other types.

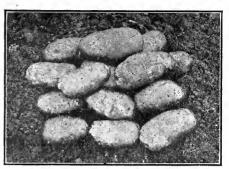

The best pie pumpkin on the market and requires less sugar and eggs than any other. They mature very early, are of medium size, rather flattened in shape and covered with heavy netting. The exterior is a rich orange, while the meat is very thick, finegrained and of a rich golden color.

Our strain is a good keeper, very prolific and has no equal for quality or appearance. Pkt., 10c—oz., 20c—1/4 lb., 60c—lb., \$1.75.

Mammoth Tours—A variety of immense size, grown for stock feed and exhibition. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 50c—lb., \$1.50.

*Connecticut Field, or Jack O'Lantern—The common field pumpkin grown for stock feeding and jack lanterns. Some prefer it for pies. Our seed is carefully selected for jack lantern shapes. Rich orange colored skin. Pkt., 10c—oz., 15c—1/4 lb., 40c—lb., \$1.00.

Small Sugar—Rather round fruit of small size, usually 5 to 7 inches in diameter. Smooth skin of bright orange color. Fine quality for pies. Early maturity. Pkt., 10c—oz., 20c—¼ lb., 45c—lb., \$1.35.

Reliance Potatoes

Improved Large Cheese—Heavy, thick meated pumpkins with deep salmon flesh; cooks fine grained and sweet; excellent for pies. Rather flat fruit, flesh orange color. A heavy yielder and fine for stock. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 45c—lb., \$1.35; postpaid.

Oregon grown Squash and Pumpkin Seed give far better results than any others. Don't overlook the importance of acclimated seed.

RADISH

Prices—Unless otherwise noted, radish seed is offered as follows: Pkt., 10c—oz., 15c— $\frac{1}{4}$ lb., 40c—lb., \$1.35; postpaid.

*WHITE PEARL—The best of the white radishes; roots five to seven inches long; of a beautiful pearly white color. Stands fine without going woody. Similar in shape to White Icicle, but superior in quality. Flesh tender, crisp and sweet. Pkt., 10c—oz., 20c—1/4 lb., 50c—lb., \$1.75.

Early Scarlet Globe—Beautiful scarlet globe-shaped radish, of quick maturity and exceptionally fine flavor. Good market sort.

Early Scarlet Turnip, White Tipped—Turnip shaped radishes, scarlet with white tips. A popular market radish sold by the vegetable men the year around. Excellent quality and extremely early.

Crimson Giant—A crimson, turnip shaped radish that combines large size with extreme earliness. A splendid radish that does not go pithy very soon.

Long Bright Scarlet, White Tipped—A beautiful radish; clear, bright scarlet, the roots of which grow about six inches long, and are tipped white. This is a fine radish of good quality.

French Breakfast—Extra early, of oblong shape. The upper portion deep rose and lower part white.

*THE SPARKLER—One of the best for market gardeners. Larger than Early Scarlet Turnip White Tipped and of brighter color. The upper half is bright scarlet, while the lower half is white, making a sharp and pretty contrast.

Cincinnati Market—An excellent radish of scarlet color; five to seven inches long; skin very thin, flesh crisp, brittle and of good flavor. Pkt., 5c—oz., 15c—14 lb., 40c—lb., \$1.35.

White Icicle—A splendid white radish of long shape and with mild flavor. This radish is a general favorite.

WINTER VARIETIES

Scarlet China—Roots of bright scarlet color; fine quality. Sow in September for winter use.

Long Black Spanish—Long black winter radish. Sow in August. Pkt., 5c—oz., 15c—¼ lb., 40c—lb., \$1.25; postpaid.

Round Black Spanish—Same as the Long Black Spanish, except round shape.

White Chinese—Long white, stump rooted radish, always solid, crisp and mild.

JAPANESE RADISH—This remarkable radish will grow over three feet long and weigh 10 to 15 lbs. each. If properly stored they will keep through the winter like rutabagas. Plant about August 1st to 15th. Pkt., 10c—oz., 20c—1/4 lb., 65c—lb., \$2.00.

TRUE TYPE HUBBARD SQUASH

SQUASH

Plant from May 10th to 20th in hills 10 feet by 10 feet. 8 to 10 seeds to the hill. Thin to two strong vines. Sow 200 pounds of land plaster to the acre and plow in.

*DELICIOUS—We consider it the finest grained, driest cooking and sweetest squash in cultivation. Medium size, top shaped with greenish-black skin; flesh very thick, orange colored, with small seed cavity. Try this squash and be convinced that it is the best that grows. True seed of our own growing. Pkt., 10c—oz., 20c—¼ lb., 55c—lb., \$1.75.

*BANANA—This valuable squash is in great demand and we have secured a very fine strain of this, which has been reselected and one which is of the highest quality. The squash usually measure, under good culture, from 3 to 4 feet long and are so even in diameter that they can be piled up like cord-wood. The exterior of the skin is a buff-orange color, while the meat is a rich orange. The meat is extra thick and of very fine flavor. Pkt., 10c—oz., 25c—14 lb., 75c—lb., \$2.50; postpaid.

*Underwood Blight Resistant—A very valuable variety for Eastern Oregon and Washington or any locality which is troubled with squash blight. The squash results from a cross of three varieties and originated at Dufur, Oregon. It is not uniform in color or shape, but the quality is uniformly good. It is not recommended so much for Western Oregon and Washington. It is a very strong grower and resists blight remarkably well. Pkt., 10c—oz., 25c—¼ lb., 75c—lb., \$2.50; postpaid.

Golden Hubbard—Similar in size and shape to the Hubbard but of golden red color. Pkt., 10c—oz., 20c—¼ lb., 55c—lb., \$1.75.

POTATO SEED BALLS—These will be found interesting to grow and boys and girls should be encouraged in experimenting with them. The seed is offered in mixture and will produce potatoes of various shapes and colors. Valuable new varieties are sometimes found by planting out these seedlings. Start the plants like tomatoes and transplant. Pkt., 15c.

*True Hubbard—The standard squash, and while we do not consider it equal to the Delicious in flavor, it is a heavier yielder and is better known in the market. We have a true stock of seed, carefully selected for color, shape and quality. Pkt., 10c—oz., 20c—¼ lb., 55c—lb., \$1.50.

Boston Morrow—Skin and flesh reddish yellow. Productive and a favorite with canners. Extra good pie squash. Pkt., 5c—oz., 15c—¼ lb., 45c—lb., \$1.25.

SUMMER SQUASH

Mammoth Summer Crookneck—Grows larger than the common sort. Fine for summer use. Pkt., 5c—oz., 20c—1/4 lb., 45c—lb., \$1.50.

Mammoth White Bush Scallop—Early; large, pure waxy white skin; somewhat flattened in shape. Pkt., 5c—oz., 20c—1/4 lb., 45c—lb., \$1.50.

Italian Marrow—A large, productive variety of exceedingly rich flavor. Should be used when young. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 50c.

SALSIFY OR VEGETABLE OYSTER

*Mammoth Sandwich Island—A good sort and most generally planted. Cultivate same as carrots. Pkt., 5c—oz., 25c—14 lb., 75c—lb., \$2.50; postpaid.

SUNFLOWER

*Mammoth Russian—This is one of the heaviest yielders and produces extra large heads, well filled with large, plump seed. Oz., 5c—¼ lb., 10c—lb., 30c. E. or F., lb.

RHUBARB

Crimson Winter—Produces medium crimson stems, very early in winter and spring. Pkt., 10c—oz., 80c.

SPINACH

Sow in drills 16 to 20 inches apart; thin to 6 inches. For early spring use, sow in the fall or sow in early spring for later use

Fine fall spinach can be grown by planting seed August 20 to September 1.

Prices are uniformly as follows, unless otherwise noted: Pkt., 10c—oz., 15c—¼ lb., 30c—lb., 85c. E. or F., 10 lbs. at 70c lb.

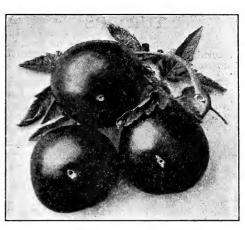

*Long Season—Rather flat compact growth and medium size; especially valuable for summer use. The short stemmed leaves are dark green and of thick, heavy texture, heavily crumpled.

*Victoria—A good, long standing sort, with large, thick, dark green leaves, slightly crumpled. Good for market or garden.

*Long Standing—Broad, arrow-shaped leaves of rich dark green. Rather late of maturity and will keep in good condition longer than most sorts.

*Savoy Leaved—An early sort generally used for fall sowing; leaves crumpled. A hardy, rapid grower Pkt., 5c—oz., 15c—14 lb., 25c—lb., 75c.

*Thick Leaf or Viroflay—Heavy dark green leaves, produced medium early. Popular with gardeners.

Gill's Select Earliana Tomato

*Prickly Winter—True seed, not to be confused with the Japanese sort. Hardiest variety. Must be sown in the fall. Leaves pointed and long, thick and succulent. Seed prickly.

TOBACCO

Connecticut Seed Leaf—This is one of the earliest maturing sorts for our Northwest climate. Pkt., 10c—oz., 40c.

TOMATOES

Plant seed in box inside or in hotbed from February 15 to March 1. Transplant May 10 to 20 in rows 6 feet wide and 5 to 6 feet in rows. A light loamy soil, well cultivated and fertilized, is best.

*GILL'S SELECTED EARLIANA - Our strain of this tomato is fast becoming recognized as the best and earliest Earlina offered anywhere. In comparison with other strains it proved earliest, largest, smoothest and most solid. These qualities are putting it in the lead for home garden, market or cannery. Fruit is rather thick from stem to blossom and of bright red color. It is in the top grade for flavor. Our selections have resulted in a decrease each year in seed production, so we must ask higher prices, especially so in view of the prices paid last season for the fresh fruit. Pkt., 20c-1/4 oz., 75c-oz., \$3.00-1/4 lb., \$10.00.

Hill Selected Seed—Pkt., $35c-\frac{1}{2}$ oz., \$2.50.

DWARF STONE—Growth similar to Quarter Century but fruit are much larger. The smooth fruit are very meaty and of high quality and of bright scarlet color. Pkt., $10c-\frac{1}{2}$ oz., 40c-oz., $60c-\frac{1}{4}$ lb., \$1.75.

JOHN BAER—An extra early sort of large size. The fruit are nearly round, smooth, firm, bright scarlet and of high quality. The vines produce splendid yields throughout a long season. Pkt., $10c-\frac{1}{2}$ oz., 35c-oz., $65c-\frac{1}{4}$ lb., \$2.00.

BONNY'S BEST EARLY—On account of its great uniformity this makes a popular tomato for packing. It yields heavy crops of bright scarlet tomatoes, which ripen about two weeks after the Selected Earliana. We carry an extra fine strain of this popular market gardeners' tomato. It is also popular for greenhouse growing. Pkt., $10c-\frac{1}{2}$ oz., 50c-oz., $90c-\frac{1}{4}$ lb., \$3.00.

Chalk's Early Jewel—A reliable sort; while larger fruited than Bonny's Best, it is not quite so uniform in shape; a heavy yielder of good flavored fruit. Our seed is carefully selected. Pkt., $10c-\frac{1}{2}$ oz., 40c—oz., $75c-\frac{1}{4}$ lb., \$2.50.

Stone—One of the largest and most solid bright red varieties. Fruit nearly round, slightly flattened, exceptionally smooth and uniform. Unusually fine for slicing and canning. Pkt., 5c—½ oz., 30c—oz., 50c—¼ lb., \$1.75.

SMALL FRUITED TOMATOES

*Yellow Pear—Used for preserving, extra early and produces an abundance of yellow, pear-shaped tomatoes. Pkt., 10c—oz., 50c.

Red Pear—Same as Yellow Pear, except color. Pkt., 10c—oz., 50c.

Ground Cherry or Husk Tomato—Prized for preserves, pies and sauce. Will keep into the winter. Pkt., 10c—oz., 50c.

TURNIPS

Deduct 5c per lb. by Express or Freight on turnips and rutabagas. Sow broadcast from August 1 to 20th for late turnips.

*EXTRA EARLY WHITE MILAN—Among the earliest; roots clear white, smooth, flat and good quality. The best for early planting in the spring or for late fall sowing. Pkt., 10c—oz., 25c—1/4 lb., 65c—lb., \$2.00.

EXTRA EARLY PURPLE TOP MILAN—Similar to Extra Early White Milan except the roots are a little flatter and are attractive purple-red on the upper portion. Pkt., 10c—oz., 25c—1/4 lb., 65c—lb., \$2.00, postpaid.

Early Snowball—An extra early turnip, snow white, crisp and solid. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 55c—lb., \$1.50.

White Egg—A quick growing, egg-shaped, smooth, pure white variety with flesh very sweet, firm and mild. The best table quality. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 45c—lb., \$1.25.

Cow Horn—A large, long-rooted, white turnip, largely used for stock feeding. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 50c—lb., \$1.50.

*Pomeranean White Globe—A large globe shaped, smooth, white turnip. Good either for stock or table; resists the worms the best. One of the best keepers. Pkt., 10c—oz., 20c—¼ lb., 45c—lb., \$1.10.

Purple Top Yellow Aberdeen—This is largely grown for stock feeding. The roots are yellow with purple top, the flesh yellow and of fine texture. A fine keeping sort. Pkt., 10c—oz., 20c— $\frac{1}{4}$ lb., 45c—lb., \$1.25.

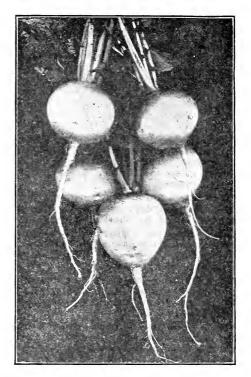

*Purple Top White Globe—We consider this the best all around late turnip for fall and winter use. Its beautiful color, pure white with purple top, combined with its smooth globe shape, fine sweet flavor and its wonderful productiveness, put this turnip in the front class for either market or home use. We have an unusually fine strain of this seed. Pkt., 10c—oz., 20c—1/4 lb., 40c—lb., \$1.00.

*Orange Jelly, or Golden Ball—The best yellow sort for market or family use. Root medium sized, round and smooth, with yellow skin and flesh. One of the most popular varieties for canneries. Pkt., 10c—oz., 15c— $\frac{1}{4}$ lb., 40c—lb., 1.25.

VEGETABLE ORANGE

Grows somewhat like a muskmelon; small-sized, round-shaped, orange-colored fruit; fine for sweet pickles and preserves; yields heavy in this climate. Pkt., 10c—oz., 50c.

Use our General Fertilizer for Tomatoes. It is especially suited for them.

Orange Jelly Turnips

RUTABAGAS

Sow in drills, 3 feet wide; thin to 6 inches apart. May be planted from June 15th to July 15th. The later sowings make roots of the best quality.

*IMPROVED PURPLE-TOP YELLOW—We find this the best all-around Rutabaga. Produces nice, smooth globe-shaped roots free from side roots. The best for table use and very rich and productive for sto k feeding. It is early and will mature good roots, planted late in the season. Good seed from selected roots. Pkt., 10c—oz., 20c—1/4 lb., 45c—lb., \$1.25—10 lbs., @ \$1.00, postpaid.

Sweet Russian—One of the best white-meated Rutabagas. A good yielder. Pkt., 10c—oz., 20c—¼ lb., 45c—lb., \$1.25.

BANGHOLM GRANT — Large globe-shaped roots with yellow flesh and small necks. Exterior skin pale yellow, with purple tops. Roots very smooth and of good quality. Very popular with dairymen. Pkt., 10c—oz., 20c—1/4 lb., 45c—lb., \$1.50—10 lbs. @ \$1.25, postpaid.

DILL

Dill is very popular upon the markets and will give the grower splendid returns. We carry the large variety. Pkt., 10c—oz. 20c—1/4 lb., 50c—lb., \$1.50.

Mignonette-Defiance Mixed.

Salvia-Splendens.

Godetia-Crimson Glow, Rosamond.

Ten Week Stocks-Red, Pink and Purple.

Zinnia-Scarlet, Yellow, Crimson, Pink, Orange and Mixed Giants.

Sweet Alyssum-Trailing or Dwarf.

Lobelia-Blue, Trailing or Dwarf.

ALFALFA SEED

We can supply Dry Land Alfalfa, also Seed Grown by Irrigation and Grimn

GRIMM ALFALFA-Several of our customers who have tried Grimm will use no other strain of Alfalfa. We are slow to introduce novelties unless they prove of real value, and we feel there is no question about the good points in growing Grimm and can recommend it strongly. There are very definite advantages in growing the Grimm in preference ot other varieties; it is absolutely hardy, so there is no danger whatever of winter killing; it starts to grow earlier in the spring; its branch root system permits it to grow on hardpan soils and where water is near the surface; and it is finer and leafier. Be sure of getting the genuine Grimm Alfalfa. Our seed is direct from the introducer and he secured his original seed of Wendelin Grimm. Lb., \$1.00, postpaid. E. or F., lb., 90c-10 lbs. or more at 80c lb.

Section of Field Seeds

Owing to constant changes in prices we cannot guaranteed any of the prices made; however, most of these given are on small lots and we do not expect to change these. Field Corn, Stock Kale and Sunflowers are listed in the Vegetable Section. Samples of all field seeds sent you upon request.

Grasses for Lawns

Write for Prices on Quantities

Oregon Lawn Grass—Best general mixture for lawns containing the finest leaved grasses in correct proportion. Mixed from deep-rooted grasses that will make a lawn that is green summer and winter. Use about one pound to 400 square feet.

Price with White Clover... Lb., 55c, post-paid. E. or F., lb., 50c—10 lbs., at 45c lb.

Price without White Clover. Lb. 35c.

Price without White Clover. Lb., 35c, postpaid. E. or F., lb., 30c—10 lbs. at 25c per lb.

per ru.

Shade Lawn Mixture—A special mixture for shady places. Soils of this nature should be treated with air slaked lime before sowing. This will prevent souring. Use about 5 lbs. of lime to 100 square feet. Lb., 75c, postpaid. E. cr F., lb., 70c—10 lbs. at 65c per lb.

Kentucky Blue Grass—Used extensively for lawns. Sow 1 lb. to 400 square feet. Fancy seed. Lb., 45c, postpaid. E. or F., lb., 40c.

English Rye Grass—This is used for lawns by many gardeners, and if sown thickly will make a good hardy lawn. Especially desirable for large grounds and parks. Lb., 25c, postpaid. E. or F., lb., 20c—10 lbs. at 16c lb.

White Clover—Some prefer to sow the pure white clover for lawns. It is exceptionally hardy and permanent. We carry a very high grade seed. Lb., 80c, postpaid. E. or F., lbs., 75c—10 lbs. at 70c lb.

Other mixtures for special purposes can be supplied. Also lawn fertilizers. Drop us a card regarding these.

Grass Seeds for Field and Pasture

We can supply various grasses such as Kentucky Blue Grass, Canadian Blue Grass, English Rye Grass, Italian Rye Grass, Timothy, Orchard Grass, Ted Top, Tall Meadow Oat Grass, Meadow Fescue, Sheep's Fescue, Mesquite. We can also supply pasture mixtures. State nature of your soil and requirements.

Prices are so much subject to change we do not quote them here, but will be glad to mail samples and prices on request. Kentucky Blue Grass and English Rye Grass are priced in the list of Lawn Grasses. If customers desire they can mail us remittance and we will fill the amount at the market prices when order is received.

Clover and Alfalfa Seeds

We carry a stock of Red Clover, Aliske Clover, White Clover, Sweet Clover and Al-

falfa. We can also supply Mammoth Red Clover.

Prices are usually changing throughout the season, so we do not quote them here, but will fill according to the market price when order is received. White Clover is priced in the Lawn Grass Section. For Alfalfa, see page 21.

Grain Seeds

Prices vary so much, we give only small lot prices, postpaid. If interested, write us and we will quote prices, or you may remit what you desire and we will fill the amount according to market prices.

SEED OATS

OREGON HULLESS—A splendid branching oat, early and a heavy yielder that threshes entirely free from hulls. Grow some of this and make your own oatmeal at home. Per lb., 25c—3 lbs., 60c; postpaid.

Oregon Eclipse—Side oat. Produces immense yields of plump, heavy, thin-hulled, white oats of finest quality. Lb., 20c—3

lbs., 50c; postpaid.

Oregon Climax—Tree oat. A very hardy, early oat with large, white, plump grains with thin hulls. Withstands freezing or drouth to an unusual degree. Lb., 20c—3 lbs., 50c; postpaid.

Golden Bonanza — Very early, strong straws, large plump golden grains. Lb., 15c —3 lbs., 35c; postpaid.

Gray Winter, Swedish Red and Black Oats. Lb., 15c—3 lbs., 35c; postpaid.

SEED WHEAT

Marquis—Earliest and heaviest yielding hard spring wheat. Hardy and vigorous and excellent for milling. Lb., 15c—3 lbs., 40c.

Blue Stem (Spring), Little Club (Spring), Red Chaff (Spring), Forty Fold (Winter), and Turkey Red (Winter). Each at, lb., 15c—3 lbs., 40c; postpaid.

SEED BARLEY

Orderbrucker—Very prolific and the earliest barley; 6 rowed heads on stiff, rust-resistant straw.

White Hulless or Bald—Very early spring variety, beardless, with heavy, plump grains, Heavy yielder and of high feed value.

Black Hulless—Good either for fall or spring. Extra heavy yielder. The best for

fattening stock.

Beardless—Practically free from beards, and extra early. Yields very heavy and is popular for hay.

Prices—All barley, lb., 15c—3 lbs., 40c.

Write for quotations on quantities.

MISCELLANEOUS FIELD SEEDS Write for Prices on Quantities

CHUFAS OR EARTH ALMONDS—Valuable for hay, while the nut-like roots are valuable for hogs and poultry. Desirable in the dry sections and also produce well in the Willamette Valley. Lb., 25c—3 lbs., 60c; postpaid. Write for prices on quantities.

SUDAN GRASS—A forage plant, belonging to the sorghum family. It responds best to corn cultivation methods. It produces best when drilled in rows and cultivated, but good yield can be secured on clean ground by broadcast seeding. Plant in May at corn planting time. Drills 36 inches apart require 3 to 4 lbs. per acre, and when sown broadcast, 15 to 20 lbs. It produces 3 to 8 tons of feed per acre, and all kinds of stock relish it. ½ lb., 20c—lb., 35c. E. or F., lb., 30c—10 lbs. at 25c lb.

VETCH—Common. For hay sow equal weight mixture of vetch with oats, wheat or rye at rate of two bushels per acre. Sow in fall or early spring. Lb., 15c—3 lbs., 40c.

Hairy, Sand or Winter Vetch—Thrives on poor, arid, sandy soils, and can be sown in mixture with various grains. Lb., 40c—3 lbs., \$1.00.

FIELD PEAS—Canadian. Lb., 15c-3 lbs., 40c.

Blue Bell—Hardy dwarf sort with deep green peas, even after ripening. Desirable variety for pea soup or other table purposes. Lb., 15c—3 lbs., 40c.

ARTICHOKE (White Jerusalem—lb., 15c—3 lbs., 35c. E. or F., 100 lbs., \$3.00.

MILLET—Golden. Lb., 20c—3 lbs., 50c. *Hog Millet—Rapid growing large seeded variety and valuable for hogs and poultry. Extra early. Lb., 20c—3 lbs., 50c; postpaid.

BUCKWHEAT—Silver Hull and Japanese. Lb., 20c—3 lbs., 50c.

CHEAT SEED-Lb., 15c-3 lbs., 40c.

COW PEAS—Whip-Poor-Will. Lb., 20c —3 lbs., 50c.

EMMER-Lb., 15c-3 lbs., 40c.

FETERITA—Lb., 15c—3 lbs., 40c.

FLAX-Lb., 20c-3 lbs., 50c.

KAFFIR CORN-Lb., 20c-3 lbs., 50c.

RYE—Common Bearded—Winter; lb., 15c —3 lbs., 40c.

SUGAR CANE—Early Amber. Lb., 20c—3 lbs., 50c.

NOVELTY SWEET PEAS

EARLY OR WINTER FLOWERING SWEET PEA

Grown in the open, this type begins to bloom several weeks ahead of the regular Spencer type. They are much prized for fall planting, but planted in February or March they are much earlier than the regular Spencer Peas. They continue to bloom through a long season.

AVIATOR (new 1921)—Dazzling crimson scarlet. The finest crimson scarlet yet introduced in the early Spencers. Free blooming and sunproof. Pkt., 25c.

Early Cream—Identical to Dobbies Cream in size and color; a splendid early variety. Pkt., 15c.

Early Asta Ohn—Soft lavender suffused with mauve. Pkt., 15c.

Early Wedgewood — Large bright blue flowers, semi-early. Pkt., 15c.

Early White Orchid—Large flowers of pure white. Pkt., 15c.

Forkhook Rose—Large soft rosy carmine flowers borne in three and fours, on long stems. Pkt., 15c.

Early Morning Star—Large flowers on long stems, orange scarlet. Pkt., 15c.

Early Sanky—One of the finest early white varieties. Pkt., 15c.

Early Sweet Briar—A lovely shade of pink with soft salmon or amber suffusion. Pkt., 15c.

Early Venus—White edged with pink. Has the fragrance of the orange blossom. Pkt., 15c.

PRESIDENT WILSON (Early)—Beautiful large flower of an exquisite shade of rose carmine. Pkt., 15c.

Early Flowering Mixed—A splendid mixture of early flowering varieties containing a fine range of colors. Pkt., 15c—½-oz., 60c.

FLOWER SEEDS

GILL'S HIGH GRADE ASTERS

We aim to supply the very best Aster seed that can be grown or purchased, and the most up-to-date varieties and types will be found in our list. Asters are one of the best cut flowers that can be grown and every garden should have these wonderful types.

Sow seed in boxes inside or in frames, about February 15th to March 1st, and transplant during May. In ordering, simply say Crego White, King White, etc.

MAMMOTH BOUQUET ASTERS

This distinct new type is now offered for the first time and is a cross between the Crego type and the branching asters. Some complaint has been found in the past with the Crego type, that the stems were not long enough, also, with the lack of size in the branching type, but in this we have a flower with long, upright, strong stems and extra large flowers. The flowers are much like the Crego but the stems are like the branching asters. Only four colors have as yet been produced, which we offer as follows: Light Blue, Dark Blue, White, Lavender Pink and Mixed. Each, pkt., 20c.

GIANT CREGO ASTERS—(See cut).

The most popular class. Immense fluffy flowers averaging 4 to 6 inches in diameter. Vigorous plants producing abundance of these large flowers on good stems. Offered in separate shades as follows: Crego Shell Pink, Crego Rose Pink, Crego White, Crego Purple, Crego Lavendar, Crego Crimson and Crego Mixed. Each, Pkt., $10c-\frac{1}{4}$ oz., 65c.

King Asters—A distinct type; very double blooms composed of long, almost straight petals, tightly rolled or quilled. Strong, sturdy plants and stems. We are offering the following varieties or colors: Crimson King, Lavender King, Pink King, Rose King, Violet King, White King and Mixed King. Each, pkt., 10c.

Late Branching Asters—This type is considered the best for cutting, as the stems are very long and strong, holding the flowers upright. They are strong, hardy growers, producing blooms 4 to 5 inches across, composed of tightly formed petals rather incurved in form. We offer the following colors: White Branching, Shell Pink Branching, Rose Branching, Purple Branching, Crimson Branching, Lavender Branching, Scarlet Branching and Mixed Branching. Each, Pkt., 10c.

CRIMSON GIANT—A new variety of the branching type seldom less than 5 inches across carried on extra long stems; color rich blood crimson and full of fire. Pkt., 15c.

PINK BEAUTY—Another novelty of this type, especially fine for cutting. Long, strong stems, carrying flowers averaging 4 inches and of a beautiful delicate blush pink. Pkt., 15c.

Type of Crego Asters

Gill's Fancy Mixed—This is a splendid mixture of about 20 reliable sorts and will contain nearly every color known in Asters. There are few better mixtures on the market than this and it is sure to please. Pkt., $10c-\frac{1}{4}$ -oz., 75c.

SINGLE FLOWERED ASTERS

GENERAL JOFFRE (New Scarlet).—A large flowered single red; excellent for cutting. Pkt., 15c—2 pkts., 25c

Single Asters, Separate Colors: White, Dark Blue, Lavender. Each, Pkt., 15c.

Single Mixed—Fine assortment of colors. Pkt., 10c.

ASTER COLLECTION A—Any 10 pkts., your selection of those priced at 10c, for 75c.

ASTER COLLECTION B—Any 10 pkts., your selection of 15c pkts., for \$1.00, post-paid.

Read about our special bargains on the back cover of this catalog.

ABUTILON

(Flowering Maple)

Tender perennial shrubs of easy culture. Generally used for potting inside, but can be started early and used for bedding outside. Mixed colors. Pkt., 15c.

AGERATUM

Beautiful annuals, suited for boxes, pots and borders.

Blue Perfection—Large, deep blue; compact growth. Pkt., 10c.

Dwarf White—8 inches high. Pkt., 10c. Mixed—Pkt., 5c.

AFRICAN DAISY

Showy annuals from South Africa. Sow seed same as asters or petunias and plant in sunny position. They bloom the greater part of the summer.

Aurantica—Flowers 2½ to 3 inches across of a rich glossy orange gold, with dark disc

and halo. Pkt., 10c.

New Hybrids—A grand new mixture varying in color from the purest white through the shades of yellow and orange to rich salmon shades many being zoned with these colors around a black disc. Pkt., 20c.

AGROSTEMMA

(Mullen Pink)

Free flowering perennial of easy culture. Blooms the first season if started early. Foliage silvery white, the blooms are single and of a rich crimson color. Pkt., 10c.

AQUILEGIA

(Columbine)

Popular hardy perennials. Can be started inside or in the open. When large enough to transplant, move them to permanent places. Blooms seldom start until second year.

Long Spurred Hybrids—Extra long spurs. Shades and combinations of blue, white, pink, yellow, orange and scarlet. Pkt., 15c.

California Hybrids—Long spurred flowers in orange and yellow shades. Pkt., 10c.

Coerula—Violet blue and white combinations; 2 feet. Pkt., 10c.

ALYSSUM

CARPET OF SNOW—A carefully selected strain growing about two and one-half inches high and 12 to 18 inches in diameter. The white blooms are heavily massed, covering the foliage and giving the appearance of a carpet of snow. Pkt., 15c.

Sweet Alyssum Maritimum—Hardy annual, blooming with white flowers in early spring. Trailing habit. Pkt., 10c.

Little Gem—Of dwarf compact habit; about four inches high with white blossoms. The best sort for edgings. Pkt., 10c—1/2-oz., 30c.

Lilac Queen—Dwarf compact habit; flowers deep lavender lilac. Pkt., 10c.

AMARANTHUS

Brilliant foliage annuals growing 3 to 5 feet high. Do best in a hot, sunny location.

Candatus—Blood Red, drooping. Pkt., 10c. Sunrise—The most brilliant. Foliage bronzy crimson, each branch tipped with bright, scarlet carmine leaves. Pkt., 10c. Tricolor—Leaves red, yellow and green.

Pkt., 10c.

ANCHUSA

Dropmore Variety—Splendid hardy perennial, easily started from seed. Grows 3 to 5 feet high, covered with rich gentian blue flowers in abundance during June and July. Pkt.. 15c.

ARCOTIS (African Daisy)

Splendid cut flower, growing about two feet high. Daisy like flowers of pure white on upper portion of petal, reverse, pale lilac blue. Blooms during late summer. Pkt., 10c.

BALSAM

Hardy annuals growing one to two feet high. Plant inside or in hotbed in March. Plant out after danger of frost is over. Pkt., 10c.

BEANS, SCARLET RUNNER

A fine climber for porch or trellis. Pkt., $10c-\frac{1}{2}$ lb., 40c.

BELLIS OR DOUBLE ENGLISH DAISY A favorite perennial plant for bedding. Blooms early in the spring.

MONTROSA DOUBLE MIXED

This giant type of daisy far excells the old type, the flowers being much larger and the stems longer. Pkt., 20c.

Double Mixed—All colors. Pkt., 10c.

BRACHYCOMBE . . etc. . . etc.

Swan River Daisy—Free flowering plants, 9 inches high, covered through the Summer with small white or blue flowers. Pkt., 10c.

CANNA SEED

Soak seed in warm water until they show signs of swelling and plant in hot bed. Transplant after danger of frost is over. It is very interesting to grow them, as new sorts are originated from seedlings. Pkt., 10c.

CALENDULA, POT MARIGOLD

The old fashioned marigold, splendid for borders. A hardy annual that blooms from early to late.

Lemon Queen—Same habit of growth as Orange King; double bright yellow flowers, three and one-half inches in diameter. Pkt., 10c.

Meteor—Large double yellow, petals striped with orange. Pkt., 10c.

Sulphur Crown—Pleasing sulphur color, double. Pkt., 10c.

Double Mixed—All colors. Pkt., 5c.

Orange King—Large double flowers of a dark orange red. Pkt., 10c.

CALLIOPSIS

Showy annuals, of easy culture, blooming all summer. Sow in April where they are to bloom.

Crimson King-Crimson garnet. Pkt., 10c. Golden Wave-Golden yellow with brown centers. Pkt., 10c.

Coronata-Large pure yellow flowers, ex-

cellent for bedding. Pkt., 10c. Nigra Speciosa—Grows 2 feet high; flow-

ers rich reddish maroon. Pkt., 10c. Choice Mixed—All single colors. Pkt., 5c.

Double Mixed-Pkt., 10c.

CARNATION MARGUERITE

There are few flowers which give such splendid results for cut flowers, and with their easy culture and quick results they should be more planted.

Separate Colors-In scarlet, white, rose,

at 15c per pkt.

Giant Marguerite Mixed—This is one of the finest mixtures and produces immense flowers of every hue known in carnations. A border of these will make a grand show-Pkt., 15c.

EVERBLOOMING-Almost continually in bloom, containing many shades in mixture. Seed saved only from double flowers. Pkt.,

20c.

CANTEBURY BELLS

This old fashioned flower is deservedly becoming very popular and is very easy of culture. Plant seed in a box or frame in early spring and set out in the position you wish them to bloom in the coming season. They can also be started by planting seed in the open ground, covering very lightly, and over-laying the bed with paper to prevent the seed from drying out until they have germinated.

Cup and Saucer Bells-The largest and best type, with cup and saucer shaped flowers. We offer these in separate colors as follows: White, Blue, Pink and Mixed

at 10c pkt.

Medium—(Single Canterbury Bells). The old fashoined type with bell shaped blooms. Offered in Blue, Rose, White and Mixed, at 10c pkt.

Medium, Double Mixed, Pkt., 10c.

Peach Bells Mixed-Peach Bells are a true perennial and one of the best of the bell-flowers. Blue, white and purple, mixed. Pkt., 15c.

CANDYTUFT

Sown in the Fall, will flower in early Spring; sown in April will bloom in June.

Hardy and easy of culture.

GIANT HYACINTH—A very carefully selected strain, producing 6 to 7 large, erect, perfect spikes of pure white. decided improvement over other varieties. Pkt., 15c.

Empress—Fine white. Pkt., 10c.

Lavender—Delicate rose lavender. Pkt.. 10c.

Carmine-Bright carmine rose. Pkt., 10c. Crimson-Rich deep shade. Pkt., 10c.

CANDYTUFT—Continued

Little Prince—Very desirable for borders or edgings, also boxes and tubs. Pkt., 15c. Mixed—All colors. Pkt., 10c.

CASTOR BEANS

Highly ornamental plants, satisfactory for massing or as center plants for beds. Offered in mixture. Pkt., 10c-oz., 20c.

CELOSIA PLUMOSA

Thompson's Superb-Of pyramidal growth attaining a height of about 2 feet and producing graceful, feathery plumes of the most brilliant crimson. In sunlight, the rich color of the flower spikes is beautifully contrasted with the bronze-colored foliage. Pkt., 15c.
Thompsoni Magnifica—Like the preced-

ing except in color, which vary in the most magnificent shades, ranging from the clearest yellow to the darkest blood-red.

15c.

Golden Plume—Bright, golden - yellow

plumes. Pkt., 10c.

Childsi or Chinese Wool Flower-Produces large heads of rich crimson, resembling certain silky wool materials. Plants strong and hardy, growing about two feet high. Useful for beds, also for cutting and drying. Pkt., 15c.

CELOSIA CRISTATA (Cockscomb)

Free-blooming annuals, growing best in rather light soil, not too rich; make grand border plants and are attractive for pots. Seed can be sown under cover in early Spring and planted out in May, or may be sown out of doors in May.

Empress-Combs of colossal proportions; they have been grown measuring 45 inches from tip to tip; rich crimson. Pkt., 15c.

CENTAUREA

Royal Sweet Sultans-Beautiful, sweetscented, artistic flowers, borne on long stems. Fine cut flowers. Sow early in Spring. Finest Mixed. Pkt., 10c.

White Leaved Centaures (Dusty Miller)-Fine for beddings, vases, hanging baskets, pots, etc. Foliage silvery white. perennial, easily started from seed. varieties mixed. Pkt., 15c.

CHRYSANTHEMUM

Double Mixed-Annual type with yellow and white shades. Pkt., 10c.

Single Mixed-Annual mixture of many colors. Pkt., 10c.

CLARKIA

i ani Valuable annuals, growing 2 to 21/2 feet tall. The leafy branches covered with double flowers are fine for cutting. Easily grown.

White Prince-Fine white sort. Pkt., 10c. Scarlet Queen-Orange scarlet. Pkt., 10c. Salmon Queen—Salmon Pink. Pkt., 10c. Orange—Pretty orange shade. Pkt., 15c. Double Mixed-All shades. Pkt., 10.

COREOPSIS

Lancelota Grandiflora—One of the easiest of all hardy perennials to grow, blooming the first year from seed, if sown early. Large showy, bright yellow flowers produced freely from June until frost. A splendid cut flower. Pkt., $10c-\frac{1}{4}$ oz., 25c.

CORNFLOWER, CENTAURIA CYANUS

The common Bachelor's Button.

Single Mixed—All colors. Pkt., 5c.

Double Mixed—Various colors. Pkt., 10c.

Double Blue—A large flowering semi-double sort, especially fine for cutting.

Pkt., 10c.

Double Pink—Large double pink. Pkt.,

Single Blue—Large bright blue. Pkt. 10c.

COSMOS

Hardy annuals which, planted after danger of frost in the open, will bloom in the late fall when flowers are scarce. Fine cut flowers.

Mammoth Perfection Cosmos—A strain of extra large flowers. Offered in Pink, Striped, Crimson and White, at 10c per pkt. Mixed—All colors. Pkt., 10c.

NEW DOUBLE COSMOS

After years of patient effort, these grand novelties have been developed and are sure to create a sensation wherever grown. They are not fully fixed in habit, but most of the plants come true to their double form. They mark a new epoch in the development of this desirable Fall Flower. The form of the flower is much like the Golden Glow or a mature decorative dahlia. We offer Double White, Double Pink, Double Crimson, Double Mixed. Pkt., each 25c.

Double Crested Cosmos—A distinct type with a single outer row of large petals, while shorter petals compose a full double center, giving it the appearance of an Anemone flowered dahlia. This is a very distinct type of cosmos and is an effective cut flower. Offered in the following colors: Soft Pink, Dark Crimson, Pure White and Fringed White. Pkt., each 20c.

EXTRA EARLY COSMOS

Mammoth Early Flowering (new)—The flowers average 4 to 5 inches across, surpassing the late varieties in size. Planted in the open ground, the white blossom in 60 days, the pink in 65 days, and the crimson in 70 days. Offered in White, Pink, Crimson and Mixed. Pkt., 15c.

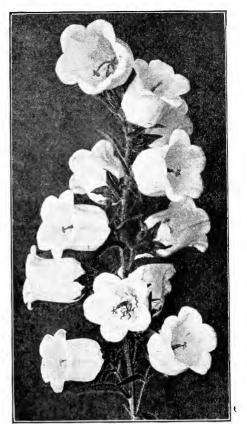

Extra Early Flowering Mixed—A good mixture of the well known early flowering type. Pkt., 10c.

COBEA

Rapid growing annual climber. Should be started indoors in March or planted outside in May.

Scandens—Large purple, bell-shaped flowers. Pkt., 10c.

Scandens Alba—Pure white. Pkt., 10c.

CANTERBERRY BELLS
(For Plants, see Perennials)

CUCUMBER WILD VINE

Quick growing annual climber. Foliage bright green with sprays of white flowers. Pkt., 10c.

DAHLIA SEED

Growing Dahlias from seed is very interesting. They should be started like asters and transplanted about May 1st to 20th.

Choice Mixed—This mixture embraces many colors in different types of dahlias. Pkt., 15c.

DELPHINIUM

(Perennial Larkspur)

Belladonna—This is the best sort for cutting and is the most ever-blooming type. Usually grows 4 to 6 feet, the flowers being loosely set on the stems, are of a beautiful turquoise blue. If started inside and transplanted they will often bloom the first season. Pkt., 25c.

Gold Medal Hybrids—Strong, vigorous plants in various shades of blue or with pink and blue combinations. Pkt., 20c.

HARDY PINKS

Double Dwarf Clove Pink—Compact growth, early flowering. Possesses a spicy clove fragrance. Perennial. Pkt., 15c.

DIATHUS, PINK

Biennials growing about a foot high. Fine for borders.

China Pinks—Mixed, double. Pkt., 10c. Diadem Pink—Beautiful double flowers; mixed, tints of lilac, crimson, purple, to very dark purple with the outer edges fringed and nearly white. Pkt., 10c—¼-oz., 20c.

Salmon King—Salmon rose. Pkt., 10c. Snowball—Large double white. Pkt., 10c. Fireball—Blood red, good contrast to the above. Pkt., 10c.

Single Royal Pinks—Improved single Japanese. Pkt., 10c.

Finest Mixed—A mixture containing various types of pinks. Pkt., 10c.

DIGITALIS (Foxglove)

This hardy perennial is deservedly very popular, as it is of the easiest culture. Can be started either inside or outside and transplanted to a permanent place. Offered in Purple, Rose, White and Mixed. Pkt., 10c.

Mammoth Foxglove—Very odd flowers, the long spikes terminate with an enormous flower, which usually opens first.

Mixed colors. Pkt., 15c.

ESCHSCHOLTZIA (California Poppy)

Hardy annual; sow in open during April. Grandiflora Giants.—This new mixture contains shades of soft pink, scarlet, chrome copper red, mauve, Claret and Royal Purple. A gorgeous mixture of this new large

flowering erect type. Pkt., 15c.

The Geisha—We consider this the finest we have ever seen, and it is a valuable cut flower. The petals are daintily crinkled; inside they are rich golden yellow, while the back of the petals are of intense orange

crimson. Pkt., 20c.

Vesuvius—Both inside and outside of petals are rich wallflower red. Pkt., 15c.

DOUBLE MIXED — Double flowers of white and yellow. Pkt., 15c.

Single Mixed—All the colors. Pkt., 5c. Alba—Pure white. Pkt., 10c.

Scarlet—Rich orange scarlet. Pkt., 10c Orange—Pure orange. Pkt., 10c.

Rosea—Bright rosy pink. Pkt., 10c.

EUPHOBIA

Strong growing annuals, suitable for beds and borders.

Variegata—(Snow on the mountains)— Attractive green foliage, veined and margined white; 2 feet. Pkt., 10c. Heterophylla—(Annual Poinsetta)—Hab-

Heterophylla—(Annual Poinsetta)—Habit of plant and foliage resembles the Christmas Poinsetta. Leaves of glossy green, which turn orange scarlet in the summer. Pkt., 15c.

FOUR O'CLOCK

Well known free flowering favorite that does well anywhere. Give plants 12 to 18 inches of room. Fine mixed colors. Pkt., 10c—Oz., 20c.

GAILLARDIA PERENNIAL

Finest Mixed—(See cut)—This is one of the finest perennials and blooms all Summer and Fall, containing shades of yellow and yellow with red halos. Pkt., 15c.

GEUM

Mrs. Bradshaw—The best variety of this wonderful perennial. The flowers are over two inches in diameter and semi-double. Color brilliant scarlet and produced on long stems, an exceptional cut flower and easily started from seed. This is destined to become one of our most popular flowers. Blooms in June and July. Pkt., 20c.

GODETIA

Pretty free flowering annuals growing 18 inches high. They do best in rather poor soil.

Duchess of Albany—Pure white. Pkt., 10c. Dwarf Mixed—All the colors. Pkt., 10c.

Dwarf Crimson Glow—The best Godetia to date. Dwarf compact plants covered with a mass of glowing crimson flowers. Pkt., 15c.

Rosamond—Similar to above with large shell pink flowers. Pkt., 10c.

Gloriosa—Dwarf, large satiny flowers of blood red. Pkt., 10c.

DOUBLE CRIMSON—Beautiful flowers. Pkt., 15c.

Double Mixed—Selected shades in mixture. Pkt., 15c.

GOURDS, ORNAMENTAL

Culture, similar to cucumbers or musk melons.

Fine Mixed—Very fine mixture. Pkt., 10c. Dipper—Very useful. Pkt., 10c.

Hercules Club—Club shaped, 4 feet long. Pkt., 10c.

White Egg Shaped—In size and shape, like an egg. Pkt., 10c.

GRASSES, ORNAMENTAL

Cloud Grass—Airy, graceful annual, looks like a line of mist when in bloom. Pkt., 10c.

Purple Fountain Grass—Graceful, purple plumes and green foliage. An effective annual for borders. Pkt., 10c.

GYPSOPHILIA, BABY'S BREATH

Elegans Alba—Fine annual with white blooms; fine for mixing with bouquets. Pkt., 10c—oz., 35c.

Muralis—An annual sort forming mounds of green 8 to 10 inches across and covered with little pink flowers from early season to frost. Fine for edging. Pkt., 10c.

Perennial—Once started these will bloom year after year. Pkt., 15c.

HELICHRYSUM

Straw Flower—Double flowers on plants two feet high. Fine everlasting flowers to put away for Winter. These bright colored flowers are exceedingly valuable for decorating and can be kept indefinitely.

Offered in Scarlet, Yellow, Salmon, Rose,

Carmine and Mixed. Pkt., 10c.

HELIOTROPE

Start indoors, plant out in May. Half Hardy.

Lemoines Giant-Double the size of the old sorts. Pkt., 15c.

HOLLYHOCK

This old fashioned flower is taking well for back-ground effects. A hardy perennial, blooming very little the first year.

Double Sorts

Separate Colors-In maroon, red, rose, salmon rose, white and yellow. Any color. Pkt., 10c.

Choice Mixed-All colors, double. Pkt.. 10c

Allegheny Mixed-Single fringed bloom. Pkt., 10c.

Single Mixed—All colors. Pkt., 10c.

IBERIS

(Hardy Candytuft)

Mixed-Easily grown from seed. Splendid bedding plant forming a solid mass of bloom one foot in height and diameter. Pkt.

KOCHIA, STANDING CYPRESS

An easily grown annual, which sown thinly in the Spring forms a cypress like hedge of the most lively green, of perfect symmetry; by mid-summer attains a height of 3 feet. In the Autumn the whole plant becomes a deep red. This is a very useful plant and should be more grown. Pkt., 10c-1/4-oz., 25c.

LANTANA

Half hardy perennial greenhouse or bedding plant. Verbena like heads of orange. white, rose, etc. Mixed colors. Pkt., 15c.

LATHYRUS

(Perennial Sweet Peas)

Strong growing, hardy climber; easily started from seed. Continually in bloom and fine for cutting. Offered as follows: Pink, white and Mixed. Pkt., 15c.

LAVENDER

Well known, hardy perennial, growing about 3 feet high. Very fragrant. Pkt., 10c.

ANNUAL LUPINE

Easily grown annuals with long spikes of pea-shaped blooms; two feet. Offered in Blue, White and Pink. Pkt., 10c.

Mixed-Pkt., 10c.

Perennial Lupine - Hardy plants with spikes three feet in height, blooming in May and June. Mixed colors. Pkt., 10c.

LOBELIA

Desirable for pots, edges or hanging baskets.

Crystal Palace Compacta—Best dark blue. Dwarf compact plants. Pkt., 10c.

Speciosa—Dark blue flower and dark foliage. Trailing. Pkt., 10c.

White Gem-Snow white. Pkt., 10c. Mixed Dwarf-All colors in dwarf varie-

ties. Pkt., 10c.

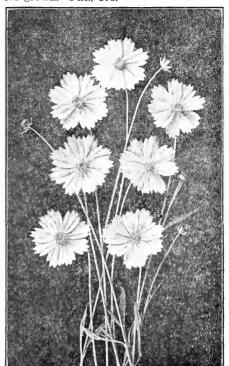

LARKSPUR ANNUAL

Hardy annuals growing two or three feet high; splendid for beds or cutting.

Separate Colors-Offered in Double Blue Double White, Double Rose, Double Crimson and Fancy Double Mixed, Each, pkt.,

LINIUM (Blue Flax)

Hardy perennial easily grown from seed: height two feet; very effective in beds or borders and one of the showiest blue flowers grown. Pkt., 10c.

COREOPSIS (For Plants, see Perennials)

LYCHNIS (Jerusalem Cross).

Easily grown from seed and will bloom the first year. Beautiful heads of scarlet flowers on stems two feet high. Pkt., 10c.

MARIGOLD French Varieties

Hardy annuals of easiest culture.

Dwarf French-Fine colors, mixed; very double; one foot. Pkt., 10c.

Tall French Mixed-Double. Pkt., 10c.

Gold Striped-Brownish red striped golden yellow. Pkt., 10c.

Legion of Honor-Dwarf compact plants, 9 inches tall. Flowers single yellow, spotted with crimson velvet. Pkt., 10c.

Tall French Striped-Double striped, extra fine. Pkt., 10c.

African Varieties

Pride of the Garden-Immense golden yellow flowers, densely double, compact plant, 15 to 18 inches high. Pkt., 10c.

Large African Mixed-Double, orange and

lemon. Pkt., 10c.

AFRICAN MARIGOLD-Continued

Orange Prince—Large double, deep, rich, golden orange. Pkt., 10c.

Lemon Queen-Large double flowers of

soft lemon color. Pkt., 10c.

Dwarf African Varieties

Dwarf Lemon, Dwarf Orange and Dwarf Mixed. Pkt., 10c.

MORNING GLORY

Climbing Mixed—All colors, 15 feet. Pkt., 10c.

Dwarf Mixed—All colors, 1 foot. Pkt., 10c.

MIGNONETTE

Keep up a succession of flowers by sow-

ing in April and July.

Salmon Queen—Strong, robust habit, with fine spikes of salmon red flowers, intensely fragrant. Pkt., 10c.

Defiance—Extra large spikes, 15 to 18 inches long, deliciously fragrant. Pkt., 10c.

Goliath—Strong compact plants, giant trusses of brilliant red. Pkt., 10c.

Golden Machet—Massive spikes of golden yellow. Pkt., 10c.

Mixed-Various colors mixed. Pkt., 10c.

MYOSOTIS, FORGET-ME-NOTS

Hardy perennials succeeding best in shady locations. Will bloom the first year if sown early.

Robusta Grandiflora—Large, bright blue

flowers. Pkt., 10c.

Everblooming Myosotis—Large clear, blue flowers, blooming from May to Autumn. Pkt., 10c.

Mixed—A mixture of blue, rose and white shades. Pkt., 10c.

NASTURTIUMS

Sow in April in rows, thin to 2 to 3 inches apart.

Dwarf Varieties

Bronze—Bronze orange. Pkt., 10c—oz.,

Golden King—Rich, golden yellow. Pkt., 10c—oz., 20c.

King Theodore—Crimson maroon, dark foliage. Pkt., 10c—oz., 20c.

Pearl—Creamy white. Pkt., 10c—oz., 20c. King of Tom Thumbs—Dark scarlet, dark

leaves. Pkt., 10c—oz., 20c. Finest Mixed—All colors. Pkt., 10c—oz.,

King Theodore, Tall—Crimson maroon, dark foliage. Pkt., 10c—oz., 20c.

Orange—Pure orange. Pkt., 10c—oz., 20c. Pearl, Tall—Creamy white. Pkt., 10c—oz., 20c.

Rose—Ruby rose. Pkt., 10c—oz., 20c. Jupiter—Giant Yellow. Pkt., 10c—oz., 20c. Spitfire—Fiery scarlet. Pkt., 10c—oz., 20c. Giant of Battles—Sulphur yellow blotched

red. Pkt., 10c—oz., 20c.
California Giants Mixed—All colors. Pkt.,

10c—oz., 20c—¼ lb., 50c—lb., \$1.50. !vy Leaved Tall Mixed—Pkt., 10c—oz., 25c—¼-lb., 75c.

OENOTHERA (Evening Primrose)

Large golden yellow flowers, easily grown from seeds. Do best in sunny position. Pkt., 15c.

NICOTINA, FLOWERING TOBACCO

Finest Mixed—A splendid mixture of colors. Pkt., 10c.

NIGELIA

Miss Jekyll—Splendid cut variety; cornflower-blue flowers. Pkt., 10c.

PENTSTEMON

Sensation—This takes rank with petunias; embraces a wide range of color, including rose, carmine, cherry, pink, lilac and purple. Grows two feet high. Not quite hardy and should be covered in winter. Pkt., 15c.

PANSIES

For plants, see list of perennials.

May be sown early inside or planted in the open in April. Sown in July and August will make good plants for the next Spring.

MADAM STEELE—Giant flower of deep velvety purple. This variety is now so well fixed that nearly all come true to color. Pkt., 25c.

ADONIS—Beautiful light blue with white center. Large size. Pkt, 25c.

BRONZE GIANTS—Different colors from burnished brass to gold, wonderfully tinged with various shades. This color is very popular. Pkt., 25c.

PANAMA PACIFIC—A huge deep yellow; some with dark centers, some without. A

desirable shade well fixed in color. Pkt., 25c, BLACK GIANT—New shade of jet black. Some of these will come purple, but the

majority are black. Pkt., 25c.
IMPROVED GRAND DUKE MICHEAL

-The finest and largest all around white pansy in existence. Pkt., 25c.

IMPROVED METEOR — Medium - sized flowers of wine red. A well fixed strain of this color. Pkt., 25c.

LONG STEMMED GIANTS—Equal in size and variety of color to Gill's Oregon Giant, but owing to careful selection this strain produces blooms on long stems; very desirable for cut flowers. Pkt., 35c.

GILL'S OREGON GIANT—After careful tests, we are convinced that this strain of Pansies produces the largest flowers and the best variety of colors of any strain we know of. If you want the very best and largest pansies, plant this mixture. While the seed is more expensive than the common sorts, you will feel well repaid to plant it. Pkt., 25c.

Gill's Giant Mixture—Grown by ourselves from larger flowering sorts. This is a reliable mixture of many good colors. Pkt. 15c.

Tufted Pansies, Mixed—While the blooms are small, they make a mass of bloom all summer. This mixture contains a great variety of shades. Pkt., 10c.

PETUNIA

DEFIANCE, LARGEST FLOWERING—Flowers often five inches in diameter, fringed, with open throats. Colors varied and indescribable. For size and beauty this is the best strain of Petunias. Pkt., 25c.

DOUBLE GIANTS—Only a portion of these come double, but these are well worth while. Those plants which show the weakest vitality in starting make the best flowers, both in the single and double types. Pkt., 35c.

Single Bedding Petunias

Snowball—Compact sort with sating white flowers. Pkt., 10c.

Star Petunia—Compact plants; cherry-red flowers with white center. Pkt., 10c.

Countess of Ellsmere—Pink with white throat. Pkt., 15c.

Blood Red—Pkt., 10c. Mixed—Pkt., 10c.

PHLOX DRUMMONDI, ANNUAL PHLOX

A beautiful annual that may be used for massing, beds, borders or pots. Sow in the open after danger of frost is over.

Select Large Flowering Varieties

Large Flowering Mixed—Contains a great variety of colors and is sure to please. Pkt., 10c.

Separate Colors as follows: White, Deep Rose, Bright Scarlet and Primrose. Pkt., 10c.

Double Mixed—Better for cutting than the single sorts. Finest colors. Pkt., 15c.

POPPIES

May be sown in the Fall or early Spring. Poppies are easy of culture and very effective flowers.

Single Sorts

Gill's Mixed Shirley—All colors. Pkt., 5c. Danish Cross—Scarlet with white spot forming a cross. Pkt., 10c.

The Bride—Pure white. Pkt., 10c.

Admiral—White with band of scarlet around the top. Pkt., 10c.

Tulip Poppy—This is one of the finest bedding Poppies we have ever seen. It grows from 15 to 20 inches high and is simply a blaze of bright scarlet tulip-shaped flowers. A splendid sort for bedding or massing. Pkt., 10c.

Chas. Darwin—New single Poppy of rich dark purple with velvety black spot at the base of each petal. Pkt., 10c.

Double Sorts

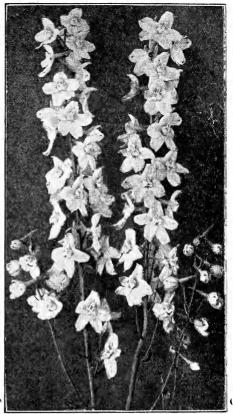

DOUBLE SHIRLEY MIXTURE—This contains all the latest new shades, and is a wonderful mixture of double shirley poppies. Pkt., 15c.

Cardinal—Fringed flowers, cardinal red.

Pkt., 10c.

Fairy Bush — Elegantly fringed, white, tipped rose. Pkt., 10c.

Shell Pink—Soft sea shell pink. Pkt., 10c. White Swan—Immense fringed flowers, white. Pkt., 10c.

DELPHINIUM BELLADONNA (For Plants, see Perennials)

Carnation, Flowered — Double fringed, mixed colors. Pkt., 5c.

American Flag—New double Poppy, large and very double, snow white, bordered with scarlet. Pkt., 10c.

Mexican or Prickly Poppy—Plants 2 to 3 feet high, spiny foliage, large flowers in shades of yellow and white. Pkt., 15c.

Giant Yellow Tulip Poppy—Fine for cutting; large, butter-cup yellow flowers. Pkt., 10c

ORIENTAL POPPIES (Perennial)

These are easily started from seed and make a gorgeous display. Very hardy and will last for years. Fine cut flowers.

Oriental—Large, deep crimson flowers, with black blotch on each petal. Pkt., 10c.

Princess Victoria Louise—Large, soft salmon rose. Pkt., 20c.

Perry's White—Grand novelty. White with crimson blotch at the base of each petal. Pkt., 25c.

PLATYCODON (Balloon Flower)

Very hardy perennial of easy culture. Grows one foot high. Blue and white mixed Pkt., 15c.

ICELAND POPPIES (Perennial)

One of the daintiest of all flowers. They form neat fern-like tufts from which the slender flower stems protrude to a height of one foot. Single flowers of crumpled appearance. Offered in mixed shades orange, white and yellow. Pkt., 10c.

PORTULACA, SUN PLANT

A fine hardy annual, doing best in a rich loam or sandy soil. Fine for massing in beds, edging or rock work.

Single Mixed-Containing rose, scarlet, white, yellow, etc. Pkt., 10c—oz., 60c.

Double Mixed—A large per cent come

double; in similar colors to the single mixed. Pkt., 10c; 1/4-oz., 60c.

PRIMROSE, HARDY

Japonica (Japanese Primrose) - Bright showy clusters on stems 6 to 9 inches long. Mixed colors. Pkt., 15c.

Vulgaris (English Primrose)—Canary yel-

low, fragrant. Pkt., 15c.

PYRETHRUM

Golden Feather-Yellow foliaged plant, used for edging and bedding. Pkt., 10c-¼-oz., 30c.

Hybridum-Large flowering, single mixed. Hardy perennials bearing daisy-like flowers in various shades of pink, red and white. A fine cut flower. Pkt., 20c.

Double Mixed-Quite distinct from the single variety. Dense double flowers in various shades. A portion will come single when grown from seed, but in either case they are very pretty. Pkt., 35c.

RUDBECKIA, ANNUAL

Bicolor Superba-Form a dense bush producing flowers in great abundance. disc is brown, the florets golden yellow. Pkt., 10c. Fine for cutting.

SALPIGLOSSIS

Sow indoors for early, or can be sown outside after danger of frost is past.

Large Flowering Mixed—Pkt., 10c.

Dark Scarlet-A very beautiful flower. Pkt., 10c.

SALVIA

(Scarlet Sage)

Sow indoors in March, plant out in May. Splendens—Bright scarlet, 3 feet. 10c.

Patens-Intense blue flowers. Pkt., 20. Fireball (Dwarf Salvia)-Neatly rounded plants, eighteen inches high; bright scarlet flowers. Pkt., 15c.

SCABOSIA OR MOURNING BRIDE

Sow outside after danger of frost is past. Large Flowering Mixed-Pkt., 10c.

Separate Colors—White, Crimson, Black-purple, Rose. Pkt., 10c.

SCHIZANTHUS

(Butterfly or Fringe Flower)

New Giant Hybrids-An easy, quick growing annual that should be more planted; also desirable for pots. This is one of the best mixtures to be had and contains a great array of colors. Pkt., 15c.

SHASTA DAISY

Alaska-The popular evergreen perennial, with single flowers, often 5 inches across, of purest glistening white. A splendid cut flower. Pkt., 15c.

SNAPDRAGON

An old fashioned flower that has come back into popular favor again. For early flowering, sow seed in the Fall and then set out in the Spring, or the plants may be started in the Spring.

Separate colors as follows: Giant White, Giant Scarlet, Giant Yellow, Giant Garnet,

Giant Pink, at 10c per pkt.

Brilliant—Scarlet, gold and white. Extra fine. Pkt., 10c.

Silver Pink-A very dainty shade of pink. Pkt., 10c.

Gorgeous-Blood red with white throat.

Pkt., 10c. Gill's Superior Mixed-This mixture contains a great variety of colors and will give good satisfaction. Pkt., 10c.

SENSITIVE PLANT, MIMOSA

A curious annual, its leaves close when touched, or if the stem is touched the whole leaf will fall. Can be grown in pots or in the open. Pkt., 15c.

STOCKS

A popular biennial. Fine for bedding or pot culture. May be started early inside or plant seed in the open after danger of frost is over. The varieties offered below will produce about 90 per cent double flowers.

Improved Large Flowering Ten Week These are a superior large flowering

Separate Colors as follows: Blood Red, White, Pink, Purple, at 15c per pkt.

Large Flowering Mixed-A grand mixture of double flowered sorts. Pkt., 10c.

SUNFLOWER

New Miniature Mixed-Numerous small flowers. Pkt., 10c.

Chrysanthemum Flowered-Double, rich golden yellow; immense blooms on strong tall stalks. Pkt., 10c.

Single "Stella"-Beautiful single flowers of golden yellow, each with black disc. Ef-

fective cut flowers. Pkt., 10c.

Red Sunflower-Plants grow 5 to 8 feet tall and the flowers range from 2 inches to a foot across. The color varies greatly, some being chestnut red throughout, while others are red tipped with yellow, still others are yellow washed with red; a portion of the flowers will come pure yellow. Pkt., 10c-3 pkts., 25c.

SWEET ROCKET

An old fashioned hardy biennial, growing from 2 to 3 feet high, bearing fragrant blossoms of white, lilac and purple, about the latter part of May. A long keeping cut flower. Easy to grow from seed. Pkt., 10c.

SPENCER SWEET PEAS

Their easy culture, freedom of bloom, delightful fragrance and artistic appearance combined with their splendid cut-flower qualities make them one of the most desirable

flowers for the general public.

Spring sowings should be made as early in the spring as the soil conditions permit. Here in the Coast regions they can often be planted in February. They can also be planted in trenches in November and with this method they will bloom very early in the spring, in fact are usually in bloom for Decoration Day. The Spencer type is by far the best, and we do not carry the Eckford types except in the Rainbow mixture, which is partly made up from that type.

ILLUMINATOR—A rich, glowing, cerise-

Agricola—Pale pinkish heliotrope flushed over a white ground with distinct wire edge of dark heliotrope. Large waved flowers. Pkt., 10c—½-oz., 40c—oz., 75c.

Apple Blossom—Bright rose standard with wings of very light primrose flushed rose carmine; large flowers. Pkt., 10c—1/2-oz., 40c—oz., 75c.

Asta Ohn—Large waved flowers of soft lavender suffused with mauve. Pkt., 15c.

Barbara—Large flowers of a beautiful salmon color. Exceptionally fine for cutting or exhibition. Pkt., 15c—½-oz., 75c—oz., \$1.25.

BLANCHE FERRY (Improved)—Rose pink standard; wings white, suffused and tinted with light pink. Pkt., 15c.

Burpee's White-Large waved flowers of

waxy white. Pkt., 15c.

Capt. of the Blues—Purple, with blue wings, beautifully waved; margin of petals marbled. Pkt., 10c—½-oz., 40c—oz., 75c.

Countess Spencer—The original Spencer pea and still one of the best. Very large flowers of open form on good stems. Color, bright clear pink. Pkt., 10c—½-oz., 50c—oz., 90c.

DOBBIES CREAM—A strong grower producing freely of large, much waved flowers and often duplexed. The rich deep cream color is very attractive. Pkt., 15c—½-oz., 75c—oz., \$1.25.

DOBBIES BLUE PICOTEE—Pure white, daintily edged with a narrow border of vio-

let blue. Pkt., 15c—½oz., 75c.

DUPLEX CREAM—Large flowers of a beautiful cream color with double standards. Pkt., 15c.

Elfrida Pearson—The color is a lovely shade of light pink, both buds and flowers being tinted with salmon pink. Pkt., 10c—1/2-oz., 50c—oz., 90c.

FIERY CROSS—Standards brilliant firered or rich orange scarlet; wings rich, cherry orange. One of the most brilliant colors known in sweet peas. Pkt., 15c—1/2·0z., 75c.

Flora Norton—Bright blue flowers of large size. A very popular variety. Pkt.,

15c—½ oz., 40c—oz., 75c.

Florence Nightengale—A soft, clean, rich lavender with light sheen of rose pink. Pkt., 10c—½-oz., 40c—oz., 75c.

HERCULES—Immense flower with standards often measuring two and one-half inches across. Color, a beautiful soft rose self. Pkt., 15c—½-oz., 60c—oz., \$1.00.

ILLUMINATOR—A rich, glowing, cerise-salmon, with artificial light the effect is orange scarlet. Flowers large and much waved. Pkt., 15c—½-oz., 75c—oz., \$1.25.

King Edward Spencer—Extra large flow-

King Edward Spencer—Extra large flowers of deep rich carmine scarlet. Often four flowers on a stem. Pkt., 15c—½-oz., 75c—

oz., \$1.25.

MARGARET ATLEE—A rich glowing pink on cream ground, softly suffused with salmon in the standard. Wings are pinking rose and salmon; a very beautiful

flower. Pkt., 15c—¼-oz., 40c.

waved flowers on long stems. The color is soft shell pink on cream ground, lightly overlaid with soft hydrangea pink. The plants are strong, vigorous growers. We recommend this variety very highly. Pkt., 15c—½·oz., 75c—oz., \$1.25.

Mrs. C. W. Breadmore—The flowers are cream with a picotee edge of decided pink. Flowers large and often four to the stem.

Pkt. ,10c—½-oz., 40c—oz., 75c.

Mrs. Routzahn—Buff or apricot ground, suffused with delicate pink, richer at the edges. Pkt., $10c-\frac{1}{2}$ -oz., 40c-oz., 75c.

OLD ROSE—A desirable new shade in sweet peas. Old rose is always a popular color, and this new variety should please. Pkt., 20c.

Othello—Considered the best of the maroon Spencer peas. The flowers are large and stems extra good. Pkt., 10c—½-oz., 40c—oz., 75c.

Paradise !vory—Beautiful large flowers of old ivory. Pkt., 15c—½-oz., 60c—oz., \$1.00

ROBERT SYDENHAM—A large flower borne on strong plants, the color being a glowing orange throughout. Pkt., 15c—½-oz., 75c.

Rosabelle—A magnificent large and finely waved bright rose. Extra fine in every respect. Pkt., $10c-\frac{1}{2}$ -oz., 40c-oz., 75c.

Royal Purple—Rich royal purple; very distinct and extra fine. Pkt., 15c.

Sterling Stent—Rich glowing deep sal-

mon, suffused with orange. Pkt., 15c. SUNPROOF CRIMSON—Large flowers of brilliant rich crimson. The blooms are not subject to burning from the heat like many other red flowered varieties. Pkt., 15c—½-oz., 90c.

WEDGEWOOD—The best light blue Spencer; large flowers on strong stems; very desirable. Pkt., 15c—1/2-oz., 75c—oz., \$1.25.

SWEET PEAS-Continued

THE PRECIDENT—Immense flowers of glowing scarlet self, carried on strong stems, usually in fours. It has been termed the "brightest color in sweet peas," and does not burn. It is far ahead of anything in the orange scarlet class. Pkt., $20c-\frac{1}{2}$ -oz., 90c.

Vermillion Brilliant—A bright intense scarlet; very popular. Pkt., 15c.

GILL'S SWEET PEAS IN MIXTURE

GILL'S PROGRESSIVE MIXTURE—This Spencer mixture contains a splendid assortment of colors, both light and heavy shades, and gives fine satisfaction every year. Pkt., 10c—0z.. 30c—1/4-1b., 90c—1b., \$3.00.

soft blend spencers—This mixture fills a long-felt want in Sweet Peas for those who desire a mixture of soft tones. This blend is made by mixing up-to-date Spencers in the following shades: Cream, light pink, white and soft lavender, mixed in the proper portions for the right effect. Pkt., $10c-\frac{1}{2}$ -oz., 40c-oz., 75c.

contrast blend spencers—Orange scarlet and rich cream. Try this for wonderful cut flower effects and also for growing together. Pkt., 15c—½-oz., 60c—oz., \$1.00.

*Gill's Rainbow Mixture—We feel confident this grand mixture contains more shades than any mixture sold. For years we have been securing mixtures from different houses, and growing them together. It contains many Spencer peas. Visitors who saw them in bloom said they had never seen so many colors in one mixture, nearly 100 different shades being in evidence. We have many fine reports from this seed. Pkt., 10c—oz., 20c—¼-lb., 60c—lb., \$1.75.

CUPID SWEET PEAS

A dwarf type growing about 6 inches in height and 15 inches in diameter. Useful for borders and edges.

SEPARATE COLORS—Cupid Blue, Cupid Cream, Cupid Lavender and Cupid Red.

Each, pkt., 10c—½-oz., 25c—oz., 40c.

Cupid Mixture—Containing all colors. Pkt., 10c—oz., 35c—¼-lb., \$1.00.

SWEET PEA FERTILIZER

This will produce immense flowers and of better color. Use one pound to 10 feet of drill, mixed into the soil before planting. Lb., postpaid, 20c—E. or F., lb., 15c—10 lbs. at 12c lb.

SWEET WILLIAM

This hardy biennial is one of the best cut flowers and is again coming to the front.

Separate Colors as follows in single sorts: White, Crimson, Maroon and Scarlet, at 10c per pkt.

Single Mixed—All colors. Pkt., 10c.

Double Mixed—Quite a portion will come double. Pkt., 15c.

NEWPORT PINK—This beautiful new Sweet William is of distinct color, being salmon rose or watermelon pink. The flowers are borne in massive heads and make very effective cut flowers. Pkt., 15c. SCARLET BEAUTY—A very striking

SCARLET BEAUTY—A very striking deep scarlet variety. Everyone should try this grand variety. Pkt., 15c.

TAGETES

Highly scented border plant, dwarf and compact, bright golden flowers. Pkt., 10c. THUNBERGIA, BLACK EYED SUSAN

Rapid growing annual climber, preferring a warm situation; useful for hanging baskets, vases, along fences, etc. Buff white, orange, etc., with dark eyes; 4 feet. Mixed colors. Pkt., 10c—¼-oz., 50c.

VERBENAS

We carry a fine strain of mammoth verbenas which have been improved and selected for years. Sow inside and set out in May, or they may be sown outdoors in May and will bloom about August.

Separate Colors as follows: Pink, Purple, Scarlet, White and Blue. Pkt., 10c.

Mammoth Mixed—Large flowers, all the colors. Pkt., 10c.

VINCA

Ornamental free flowering plants; fine for bedding. Sown outdoors in May will bloom in August.

Mixed—Pkt., 10c.

Pure White-Pkt., 10c.

WALL FLOWERS

Half hardy perennials, blooming early in the Spring.

Single Mixed—Select mixture. Pkt., 10c. Double Mixed—A fine selection. Pkt., 15c.

Goliath—A splendid single variety; flowers of a rich shining red with black velvety sheen. Pkt., 15c.

Cloth of Gold—Immense single flowers of clear rich golden yellow. Pkt., 15c.

ZINNIAS

Zinnias are one of the old fashioned flowers which, very much improved, have come back into popular favor. They are easy to grow and withstand drouth exceptionally well. The new improved giant strains we offer below are often 5 inches in diameter and make exceptionally fine cut flowers. For garden effects they are wonderful. They can be started in frames, hot beds or boxes inside like asters, or they may be planted in the open ground May 15th to June 1st.

GIANT ZINNIAS—This highly selected strain produces immense flowers twice as large as the common kinds. It is not uncommon to see blooms 5 to 6 inches in diameter. We offer this wonderful strain in the following colors. All double: Giant White, Giant Orange, Giant Scarlet, Giant Golden Yellow, Giant Crimson, Giant Purple, Giant Pink, Giant Burnt Orange, Giant Buttercup, Giant Mixed, at 15c each per pkt.

Large Flowering Mixed, fine mixture; pkt. 10c.

GILL'S SELECT GLADIOLI

PRICES given are postpaid up to and including fourth zone. 50 at 100 rate; 6 at dozen rate. Only one variety can be used to secure doz. or 100 rate. Single bulbs 10c each, except where noted.

CANNAS

Cannas are very useful for massing in beds where a tropical effect is desired. They should not be planted outside until danger of frost is over. One of the best ways to raise Cannas in this climate is as follows: Dig out the soil from the bed desired to a depth of about $2\frac{1}{2}$ feet, then fill in about one foot of fresh horse manure, loose. Tramp this down and fill in the soil, rounding up the center of the bed. The Cannas can then be planted in such a manner as to produce a mass effect. They should have plenty of water in warm weather.

We supply bulbs unless order is filled late in the season, then we send plants.

DAHLIA CULTURE

We publish a leaflet giving the history, classification and culture of the Dahlia which we wil send free to all asking for it and will also include one with each order of Dahlias. The proper time to plant Dahlias depends considerably upon the soil and location, but generally from April 20th to May 20th is the best season. Too early planting should be avoided, as the tendency is to produce an early season of bloom, thus ripening the

but generally from April 20th to May 20th is the best season. Too early planting should be avoided, as the tendency is to produce an early season of bloom, thus ripening the plants before the Fall season, the time most desirable for their best display. This does not apply to the conditions along the coast where cool breezes make the Summer a good blooming season. Here the bulbs may be planted earlier than stated above.

The bulbs should be placed about five or six inches deep, on a slight angle, but almost flat, the eye or sprout uppermost. When the sprouts have made a few inches of growth above ground, remove all but one eye, the strongest. The size of the bulb planted is not material, if it has a good eye. For complete culture, get our leaflet.

Gill Bros. Blue Ribbon Dahlias

We are the largest dahlia growers west of the Mississippi River, and have established a reputation for good, reliable stock that is true to name, and now fill orders for dahlias all over the United States. Our soil produces solid, vigorous bulbs that are, owing to their acclimation far superior to Eastern stock. We have several letters from Eastern states which claim our bulbs did far better than their own stock.

The dahlia is fast becoming the leading flower. This is due largely to their easy culture, freedom of bloom and great variety of colors and formation. There are no flowers

See dahlia culture, page 35. that can equal them for decorative effects.

DAHLIA ORDERS

Will be filled during April and May, but may be sent to us at any time for booking, and will be filled in the rotation received. No dahlia orders will be filled after June 1, except collections listed below, which will be sent up to June 15 if stock is unsold. Orders for dahlias of \$10 or more may select 10 per cent of the amount, extra, in dahlias as a premium.

GILL'S DAHLIA COLLECTIONS

Since it is impossible for us to gauge the amount of sales upon any variety in advance, we often have a surplus of dahlias left in very good sorts. This enables us to make the remarkably low rates on collections given below. These bulbs will be labeled with their correct name and no two alike, chosen with regard to color; however, they must be entirely our own selection. Prices are postpaid.

No. 1—12 Cactus Dahlias, good standard sorts, \$2.50; six for \$1.50.

No. 2-12 Peony Dahlias, \$2.25; six for \$1.25.

No. 3-12 Decorative Dahlias, \$2.25; six for \$1.25.

No. 4-12 Show Dahlias, \$1.75; six for \$1.00.

No. 5—6 Single Dahlias for 90c.

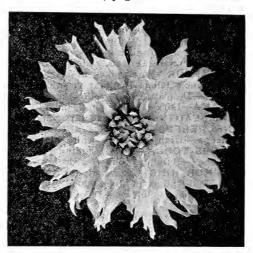

No. 6—6 Collorette Dahlias for \$1.00.

No. 7—6 Pompon Dahlias for 90c.

No. 8-12 New Dahlias, mixed, new sorts in main classes, \$3.75; six for \$2.00.

No. 9-Standard Dahlias, mixed, in main classes, 12 for \$2.00; six for \$1.25.

No. 10-GILL'S DANDY COLLECTION We offer in this collection a mixture of bulbs which are untagged, but represent good dahlias, and for those who are not particular to have the names, they will give fine satisfaction. These will be put up in advance and no selections other than our own can be permitted. Price for box of 12 good, strong bulbs, \$1.35; six for 85c; postpaid.

Hybrid Cactus-Mrs. Warnaar

DAHLIA GUARANTEE

We guarantee all the bulbs we send out to grow and to be true to name. In case of dahlias not growing they must be returned to us by July 1, of the season when purchased, with our labels attached. Sometimes bulbs are slow to sprout, but if at the end of 20 days they have not done so, remove the earth carefully from the bulb and if still dormant, return it to us; we can send you another at once; however, if it reaches us too late for planting that season, we will book the order for refilling the season following.

Flowers considered untrue to name should be sent to us by parcel post for verification. Any extras we may include free in orders are not subject to the above guar-

antee.

PRICES

The prices on all Dahlias offered include postage or express, which we prepay.

GIGANTIC YELLOW PEONY DAHLIA OUR OWN INTRODUCTION

CITY OF PORTLAND (1918 Peony)-Beyond doubt one of the finest dahlias ever introduced and, we believe, the largest yellow dahlia in existence. The gigantic flowers average 8 to 10 inches and flowers 13 inches in diameter have been pro-While these flowers are immense, they are not coarse, but give a graceful duced. artistic effect. The plants are strong and vigorous, with beautiful deep green foliage, while the stems are long, strong and erect, holding the giant flowers in an upright position. The color is a clear, deep, rich golden yellow. The variety has made a sensation wherever exhibited and won first prize for the largest bloom at the San Francisco Dahlia Show last fall. Each, \$4.00.

DAHLIAS INTRODUCED BY GILL BROS.

Our 1921 Introductions

- solder Boy (Peony)—A new garden peony dahlia of giant size and entirely distinct in color. The plants are strong and vigorous and are loaded with blooms throughout the season. Flowers nine inches across are not uncommon. The color on the face of the petals suggest the name, for it is a very close approach to Khaki. The reverse of the petals are a deep carmine rose. Many of the petals are twisted so the face of the blooms show the combined colors. The stems are not rigid but are fairly strong. The strong fort of this variety will be for garden decoration. Bulbs, \$3.50 each.
- DOMINIQUE (Peony)—A striking new varigated sort which caused much comment by visitors. We believe it is the best varigated peony yet introduced. The flowers are of large size and the petals quite long, about two-thirds from the base being a rich garnet maroon, the balance is tipped pure white. The stems are long and erect and the plants are very free flowering. Bulbs, \$2.50 each.
- CORAL QUEEN (Peony)—An immense flower of rather flat formation. The petals are very long, at the same time rather broad, the color being a beautiful coral shade zoned with yellow in the center of the flower. The plants are very strong and vigorous and bloom quite freely. Stems good. Bulbs, \$2.50 each.
- PEACHES AND CREAM (Peony)—One of the daintiest flowers yet introduced, being creamy yellow, softly toned with peach blossom-pink. The plants are rather tall but bushy and produce freely of medium large flowers on good stems. It is also a good cut flower. Bulbs, \$1.00 each.
- THEODORE ROOSEVELT (Decorative)—Tall, vigorous plants producing giant flowers of orange scarlet on strong erect stems of good length. Bulbs, \$2.00 each.
- **SULPHUR KING** (Decorative), 1921—Gigantic blooms of clear sulphur yellow. Massive, heavy flowers on good stems, produced freely. Bulbs, \$2.50 each.
- **ELEGANT** (H. C.)—This is an improved Wodan dahlia. The color is slightly different, being a more decided shading of salmon. The blooms are produced freely and are carried erect on long stems, making it a splendid cut flower sort. Everyone familiar with the Wodan variety will want this in their collection. Bulbs, \$1.00 each.

OUR OTHER INTRODUCTIONS

GARNET KING (1919 Peony)—An immense flower of bright deep garnet, carried on good stems. Strong, vigorous, free flowering plants. Each, \$2.00.

ARMISTICE (Peony)—A giant peony of pure white with strong erect stems. Flowers of flattened formation; long, narrow, flat petals radiating from a conspicuous yellow

pollen center. Each, \$1.50.

JAMES C. GILL (Peony)—This variety and Marcella Gill are the two finest cut flower sorts in our whole collection, and we doubt if they are equaled anywhere. Artistic flowers of giant size are carried on extra long stems. The plants are medium height and loaded with blooms all season. There are 4 to 5 rows of large, broad petals, the color being a bright, rich golden orange marked and toned with scarlet. It is the ideal cut flower, especially where autumn colors are needed for decorating. Each, \$2.50.

MARCELLA GILL (Decorative)—The best cut flower dahlia for florists ever introduced. The color is a delightful soft sea-shell pink, bright and attractive. It is far superior to Delice and will produce three times the amount of blooms in a season. It is among the earliest to bloom. The plants are dwarf while the stems are small, but extra long, stiff and wiry. After cutting, the flowers outkeep any other variety. The demand is so strong for this variety that we are unable to produce enough stock

to supply all orders, and we suggest early purchases. Each, \$3.00.

WASCO BEAUTY (Cactus-Peony)—A remarkable dahlia which came as the result of hybridizing with the Geisha. It is a stronger grower than its parent, and while much different in form and color, it is equally as striking. The petals are long and slender, much on the type of Philadelphia, but the flower is much larger, being of immense size. The petals are bronzy red, marked and tipped with rich yellow. The long, slightly incurved and irregular petals compose a distinct flower. Each, \$1.00.

AMAZEMENT (Decorative)—Visitors at our gardens were amazed to find pure red, pure white and variegated dahlias all on one plant. Some of the flowers were pure white except for one outer row of scarlet petals. It seems there are no regular colors for this flower to bloom, but the form is the same with all. The flowers are

full double with serrated tips. Each, 75c.

CHALLENGE (Decorative, 1918)—Another large, distinct flower that well might offer a challenge on strength of stem, freedom and perfection of bloom. The base of the petals are yellow, but from about half the distance outward to the tips they are heavily marked with deep garnet crimson. As the season advances the shades become lighter, but are at all times very pretty. One of the first to bloom and extra good for cutting. Each, 50c.

DAHLIAS INTRODUCED BY GILL BROS .-- Continued

FRATERNITY (Decorative)—A very delicate buff colored flower carried erect on long, strong stems. Stems two feet long can usually be cut and they are to be found in plenty. The flowers are about six inches in diameter and of true decorative type. Few dahlias in existence have better stems than this, and it will be a popular cut flower. Each, 75c.

POMONA (Decorative)—The flowers are extra large and of pure, deep creamy amber The stems are long and erect and valuable for cutting. The main porthroughout. tion of the bloom is composed of the usual decroative petals, but the center of the flower is decidedly quilled. Strong, vigorous, free blooming plants, always attrac-

Each, \$1.00.

FLUFFY (Peony)—A very fluffy, irregular flower of good size on rigid, erect stems. The color is a delicate buff or fawn pink. This was one of the freest flowering

plants in our grounds and was a general favorite for cutting. Each, \$1.00. EPHRAIM GILL (H. C.—Enormous blooms, often nine inches across; deep amber, suffused orange scarlet. Stems, erect and strong; strong, vigorous plants. Each, \$2.00. MASSIVE (Decorative)—A gigantic flower composed of long, broad flat petals of great

substance and produced on good stems. The massive flowers are often eight to ten

inches across and are of distinct coral orange color. Each, \$1.00.

OREGON BEAUTY (Peony)-This popular sort of our own introduction is known all over the U.S. Immense, heavy flowers on good, graceful stems; brilliant fiery scarlet, overlaid with a golden sheen. The back petals fold back to the stems. A splendid flower for cutting. Each, 35c.

MOUNT HOOD (Decorative)—Strong, upright plants of medium height; produce beau-

tiful white blooms on strong stems. The whitest of all dahlias. Each, 50c.

AUTUMN GOLD (Decorative)—Large flowers on good stems; color yellow suffused with salmon. Very popular. Each, 25c.

POINSETTIA (Duplex)—One of our most popular introductions and especially valuable for garden decoration. It is simply loaded with brilliant, fiery scarlet blo ms with open yellow pollen conters. Shape and color remind one of the Christmas Poinsettia. Each, 25c.

MRS. HELEN LADD CORBETT (Peony) -- Large flowers, borne freely on long stems;

beautiful soft pink, tinted lavender. Each, 35c.

TILLAMOOK SHOW-Immense quilled flowers of delicate blush, depening to rose Good stems. Each, 25c. Richard Buttle (Peony)-Large flowers of bright golden orange, lightly suffused with

scarlet; good stems. Each, 25c.

Netarts (Show)—White dotted and pencired with purplish crimson. Each, 20c. Moliala (show)—Large, ball-shaped blossoms of lemon yellow, tipped white. Each, 35c.

Gill's General List of Dahlias

CACTUS AND HYBRID CACTUS

Explanation .- Those varieties in our list which are capitalized are the newer introductions. H. C. indicates Hybrid Cactus; these have broader and more massive petals. We have numerous other varieties which, for lack of space, we do not list; but if there are any other varieties you wish, please write us, as we may have them. Prices—Unless otherwise noted, dozen 35c—100 for \$1.50, postpaid. E. or F., \$1.25 per 100-\$8.00 per 1,000.

Everbearing Sorts—Doz., 75c—100 for \$3.50; postpaid. E. or F., \$2.75 per 100—\$20.00 per

1,000-50 at 100 rate; 500 at 1,000 rate.

TREBLA-Grand new sort destined to become the leading market and canning berry. Extra firm, dark red fruit with a decided wild strawberry flavor. Immense crops produced on strong stiff straws, holding the berries off the ground. Doz., 60c-100 for \$2.25, postpaid. E. or F., 100 for \$2.00-1,000 for \$12.50.

Etterberg No. 121-Extremely vigorous plants producing heavy yield of high flavored fruit of very firm texture.

Wilson-Dark red fruit, popular for canning.

Marshall-Very large fruit of dark crimson throughout. Extra fine.

Magoon-Immense crops of fine, large fruit; mid-season.

New Oregon-Large, deep red fruit of fine flavor; early. Gold Dollar-Popular for first early; large firm fruit, sub-acid.

Clark's Seedling—Popular early berry; fine for market or canning. SUPERB EVERBEARING—Large, round fruit of rich, dark color; glossy and attractive. PROGRESSIVE EVERBEARING-Medium berries of rich color and flavor.

Commercial Fertilizers

All of the Fertilizers listed below are organic excepting Superphosphate and Nitrate of soda. They should be either plowed or disced into the soil. Prices are subject to change, and we will be glad to send you our price list upon request. In comparing prices, be sure to compare the plant food values as shown by the analysis.

Mixed fertilizers can be furnished according to analysis given, but other kinds vary somewhat, and in case they are different than listed, we will advise you when quoting. We will be glad to help you select the proper fertilizer for your particular crop.

PUYALLUP BERRY FERTILIZER

This is especially adapted for berries, both bush and cane. By its use growers at Gresham, Ore., and Puyallup, Wash., netted an increase of from \$200 to \$300 per acre on an investment of \$65. For currants, gooseberries and strawberries, use one-half ton per acre, and for raspberries, loganberries and blackberries, use one ton per acre. In either case apply one half in the fall or winter and the balance in early spring. Analysis; Nitrogen, 2 per cent; phosphoric acid, 10 per cent; potash, 2 per cent.

POTATO FERTILIZER. Analysis: 2 per cent nitrogen; 10 per cent phosphoric acid; 4 per cent potash. Increases in crops running from 50 to 100 per cent have resulted from the use of this special potato fertilizer. Not only are the crops larger, but the grades will be larger, bringing better prices.

GENERAL FERTILIZER. Analysis: 2 per cent nitrogen; 10 per cent phosphoric

acid; 2 per cent potash.

CLARK'S SPECIAL ORCHARD FERTI-LIZER. Analysis: Nitrogen, 6 per cent; phosphoric acid, 10 per cent; potash, 4 per cent. This organic fertilizer was formulated by a large fruit grower and is just suited for orchards. Apply to each tree at the rate of 1 pound for each year of age up to 10 years. For hops, use 1½ pounds per hill. Apply one half in fall or winter and balance in early spring.

TANKAGE

Containing ground meat, bone and blood. Analysis, 3 per cent nitrogen; 16 per cent phosphoric acid. Valuable fertilizer for such crops as cabbage, lettuce, cauliflower, spinach, etc., 500 to 1,000 pounds per acre. SAKANA, OR FISH GUANA

Analysis: 6 per cent nitrogen; 16 per cent phosphoric acid. Made from fish flesh and bone. Can be used on same crops as Tankage, and valuable for celery crops. Apply 500 to 1,000 pounds per acre.

SHEEP GUANA

Dried sheep guana is valuable fertilizer. One pound dry is equal to 8 pounds of wet manure. It is free from weeds or fungus and contains a large amount of humus. Quite soluble and quick acting. Analysis: 1.50 per cent nitrogen; 1 per cent phosphoric acid; 2 per cent potash.

BLOOD MEAL

Analysis: 15.75 per cent ammonia. Also carries some phosphoric acid. This is a very quick acting and effective fertilizer, and is also splendid for poultry feed.

POTASH (Beet Char.). Many soils need potash. Analysis, 30 to 35 per cent potash.

BONE MEAL FERTILIZER. 2.5 per cent nitrogen, 20 to 22 per cent phosphoric acid. Apply 200 to 600 pounds per acre.

NITRATE OF SODA... A quick acting fertilizer where nitrogen is needed. Its continued use on the same soil year after year is injurious to soil. Analysis on application.

SUPERPHOSPHATE. A concentrated mineral form of phosphoric acid. Analysis

given upon application.

DAHLIA FERTILIZER. Specially prepared to give strong growth, substance and color. Use one-fourth pound per plant. Lb., 25c, postpaid. E. or F., lb., 20c—10 lbs. at 15c per pound.

WHALE MEAT AND BONE. Use in same manner as Fish Guano. Nitrogen, 6 per cent; phosphoric acid, 16 per cent.

Fertilizer Suggestions

For potatoes, beets, carrots, onions, parsnips, radish, salsify, turnips and ruta bagas use 800 to 1,000 pounds Special Potato Fertilizer per acre.

VINE CROPS

For cucumbers, melons, squash and pumpkin use 1,000 to 1,500 pounds per acre of General Fertilizer.

FOLIAGE TYPE VEGETABLES

For Swiss chard, asparagus, spinach, cabbage, brussel sprouts, cress, cauliflower, broccoli, celery, kale, parsley, mustard and lettuce use 700 to 1,000 pounds of Sakana or Tankage per acre. 900 pounds of Sakana and 100 pounds Blood mixed per acre has given wonderful results on cabbage. Sheep guano is valuable on any of these crops.

EDIBLE POD OR SEED TYPE OF VEGETABLES

For beans, sweet corn and peas use 600 to 1,000 lbs. per acre of General Fertilizer.

TOMATOES, PEPPERS, EGG PLANT Use 800 to 1,000 pounds per acre of General Fertilizer.

Use 800 to 1,000 pounds per acre of General Fertilizer.

FOR SHRUBS, ROSES, ETC.

Use one-half pound per bush of bone meal, tankage or Sakana. Use a small handful of blood to the plant when setting out or where plants look weak.

LAWNS—Use two pounds per square rod of bone meal, or three pounds of Tankage. FOR FORCING PLANTS in greenhouses, frames or open ground use Blood Fertilizer.

OUR BARGAIN COUNTER

Read Before Ordering on This Page.

In offering this page of bargains we do so with the idea of encouraging a trial of our various lines, and we assure all that these are not makeshift bargains to unload worthless stock, but are genuine offers of the same standard of goods with which we supply our regular trade. All of the goods offered are for prompt delivery, weather conditions being favorable. Owing to the very close price, we can send these collections, postpaid, up to and including the third zone only; beyond that, add 10 per cent to the prices. Dahlias will be sent in April.
